Strategic Vision For Africa The Kampala Movement:

A Strategic Vision for Africa Francis M. Deng, I. William Zartman, 2004-06-23 Increasingly marginalized since the end of the Cold War the continent of Africa is struggling to identify both the root causes and possible solutions to the maladies that continue to plague it The problems read like a laundry list of misrule in the aftermath of decolonization rampant political corruption internecine wars widespread disease underdevelopment and economic collapse In the early 1990s a group of statesmen academics and civil leaders from all over Africa gathered to put together a comprehensive plan to make the continent become less dependent on the rest of the world and prepare it to compete in the new globalizing economy Those who gathered to write what would come to be known as the Kampala Document envisioned an organization which would succeed where the Organization for African Unity OAU had failed This new organization the Conference on Security Stability Development and Cooperation in Africa CSSDCA will provide a forum for discussion of democratization security issues and sustainable development This new book by noted scholars Francis Deng and I William Zartman provides a mid course appraisal of the progress of the CSSDCA as well as charting its future in relation to other regional organizations With a preface by President Olusegun Obasanjo this book will undoubtedly become an important tool in understanding Africa's present and future Francis Deng is a nonresident senior fellow in the Foreign Policy Studies program at the Brookings Institution His books include *Masses in Flight* The Global Crisis of Internal Displacement Brookings 1998 with Roberta Cohen *The Forsaken People* Case Studies of the Internally Displaced Brookings 1998 co edited with Roberta Cohen I William Zartman is Jacob Blaustein Professor of International Organizations and Conflict Resolution and Director of African Studies at the Paul H Nitze School of Advanced International Studies

The African Union Omar Alieu Touray, 2016-12-01 This book offers a comprehensive analysis of the African Union during the organization's first ten years of existence It takes the reader through the various intergovernmental processes that preceded and followed the establishment of the Union and through the workings of key organs such as the Assembly of Heads of State the Council of Ministers the Pan African Parliament and the Commission The study argues that the African Union represented a rational choice of its member states who saw it as a means to advancing their individual and collective preferences for liberation peace and security good governance and socio economic development It maintains that the African Union did not only make marked progress in a number of areas the Union also established norms that had transformational effects on military and political elites at country and regional levels However like in most agent principal relations the autonomy of the Union was limited in many ways and this affected the Union's effectiveness in such areas as human and socio economic development as well as in sustaining peace support operations At a more general level the study argues that the African Union offers clear insights into integration as a multidimensional process that no single theoretical tradition can explain in a comprehensive manner The author's response to such a theoretical limitation is fusionism an integrated approach that amalgamates various analytical

traditions in order to provide a better explanation of the processes of international integration The detailed analysis and bold proposals will undoubtedly make the study appealing not only to specialists in African Studies but equally to a broader spectrum of international relations and development scholars

Conflict Management in Divided Societies Stefan Wolff, Christalla Yakinthou, 2013-03 This textbook takes a multi perspective approach to the study of conflict management in divided societies The philosophies underpinning constitutional design are clearly explained including power sharing centripetalism power dividing and territorial self governance The actors and processes involved and the practicalities of the settlement process are covered in conceptual and theoretical contributions that include the evolution of diplomacy in peacemaking The book ends with empirical case studies that explore the realities on the ground by specialists drawing on their experience of working in conflict zones

The African Union's Role in Peacekeeping Isiaka Badmus, 2015-05-27 This study examines the African Union's peacekeeping role in managing African conflicts Based on a qualitative research methodology it analyses AU peace operations in Burundi and Somalia and hybrid peacekeeping in Darfur in order to identify the lessons learned and suggest how future outcomes may be improved

Regional Organisations and Security Stephen Aris, Andreas Wenger, 2013-10-30 This book aims to examine the conceptions and practices of security adopted by Regional Organisations ROs across the globe Since the end of the Cold War there has been an increased focus on regions as a relevant realm for security with actors within regional contexts identifying a significant degree of interdependency between one another As a consequence international security has taken on a distinct regionally institutionalised character as seen by the increase in calls for greater utilisation of Chapter VIII Regional Arrangements of the UN in order to create a devolved UN led system of global security management However the idea of a system of global security management is a remote prospect because divergence seems to be as important as commonality in terms of regional security In light of the above Regional Organisations and Security analyses the primary ROs that are active in Africa Asia Eurasia the Middle East and South America The findings of individual case studies are compiled to highlight disparities and similarities in how security is seen prioritised understood practised managed and implemented across regions On this basis the authors reach conclusions about whether we live in an increasingly globalised or regionally distinct world and go on to assess the prospects for a globalised system of security management and consider how this might be developed and organised This book will be of interest to students of comparative regionalism international organisations international security and IR

Global Governance from Regional Perspectives Anna Triandafyllidou, 2017 Global Governance from Regional Perspectives argues that the academic debate on global governance has neglected the combination of power with value constellations culture Both input and output legitimacy for instance or the exercise of control and influence are inextricably related to culture worldviews and values The book questions theoretically the Western hegemonic and hence invisible definition of governance and related concepts as well as the Western hegemony over global governance institutions It looks from the ground up whether and how alternative

practices institutions networks and concepts norms of global governance are emerging in relation to emerging powers and regional integration systems Global Governance from Regional Perspectives starts with a critical reading of global governance from multi disciplinary views and engages with two important and under studied aspects notably how global governance can be measured and what lies behind such measurements and questions the democratic deficit of global governance The book provides a series of regional and country perspectives on global governance which engage with a specific example of an institution process or issue that is used to highlight why and how the western hegemonic views and practices of global governance are or not contested The book offers a mapping of global governance phenomena in different regions of the world and a critical readings of those As such this volume is different from all international relations or political science collections on global governance and also opens up a new field of study that has been hitherto neglected in sociological or cultural studies

I William Zartman: A Pioneer in Conflict Management and Area Studies I. William Zartman,2019-05-13 The work draws on wide ranging area analysis to develop inductively new concepts and approaches for further use in explanation and application Divided into two parts it begins with analysis of revolution and socio political unrest followed by models of ethnic conflict and elite circulation in developing societies It presents the cultural dialectic present in Islam It then lays out the patterns of mediation and negotiation in managing and resolving conflict culminating with an analysis of intractables Part two on governance lays out the nature of world order cooperation and conciliation It then turns to the challenges of identity ideology and interest with some specific attention to the nature of borders and borderlands and focuses on governance as conflict management and as negotiation This book encompasses a new analysis of a neglected part of International Relation the prevention and management of conflict The book confronts sources and patterns of contentious politics with systems and methods of governance The book lays out a comprehensive conceptualization of the process of conflict management and negotiation including questions of when as well as how

Conflict Management and African Politics Terrence Lyons,Gilbert M. Khadiagala,2010-10-04 This edited volume builds on a core set of concepts developed by I William Zartman to offer new insights into conflict management and African politics Key concepts such as ripe moments hurting stalemates and collapsed states are built upon in order to show how conflict resolution theory may be applied to contemporary challenges particularly in Africa The contributors explore means of pre empting negotiations over bribery improving outcomes in environmental negotiations boosting the capacity of mediators to end violent conflicts and finding equitable negotiated outcomes Other issues dealt with in the book include the negotiation of relations with Europe the role of culture in African conflict resolution the means to enhance security in unstable regional environments and the strategic role of the United States in mediating African conflicts This book will be of much interest to students of international conflict management peace conflict studies African politics and IR in general

Power and Responsibility Bruce D. Jones,Carlos Pascual,Stephen John Stedman,2009-09-30 The aim of the Managing Global Insecurity

project is to launch a reform effort of the global security system in 2009 That task is both ambitious and urgent The time to act is now from the Foreword by Javier Solana The twenty first century will be defined by security threats unconstrained by borders from economic instability climate change and nuclear proliferation to conflict poverty terrorism and disease The greatest test of global leadership will be building partnerships and institutions for cooperation that can meet the challenge Power and Responsibility describes how American leadership can rebuild international order to promote global security and prosperity for today s transnational world Power Responsibility establishes a new foundation for international security responsible sovereignty or the notion that sovereignty entails obligations and duties toward other states as well as one s own citizens Governments must cooperate across borders to safeguard common resources and tackle common threats Power Responsibility argues that in order to advance its own interests the United States must learn to govern in an interdependent world exercise leadership through cooperation and create new institutions with today s traditional and emerging powers The result of a collaborative project on Managing Global Insecurity the book also reflects the MGI project s global dialogue extensive consultations in the United States and in regions around the world as well as discussions with the MGI project s Advisory Group composed of prominent U S and international figures The 2008 financial crisis has brought our global interconnectedness close to home But economic insecurity is just one concern Power and Responsibility provides a road map for building effective policies and legitimate global institutions to tackle today s suite of transnational challenges Kemal Dervis administrator UN Develo

Preventing Deadly Conflict I. William Zartman,2015-10-29 Conflict is inherent to all human and inter state relations but it is not inevitable Since the end of the Cold War the prevention of conflict escalation into violence through management and resolution has become a fundamental objective of the international system So how does prevention work when it works and what can be done when tried and tested practices fail In this book I William Zartman offers a clear and authoritative guide to the key challenges of conflict prevention and the norms processes and methods used to dampen and diffuse inter and intra state conflict in the contemporary world Early stage techniques including awareness de escalation stalemate ripening and resolution are explored in full alongside the late or crisis stage techniques of interruption separation and integration Prevention he argues is a battle that is never won there is always more work to be done The search for prevention necessary but still imperfect continues into new imperatives new mechanisms new agents and new knowledge which this book helps discover and apply

Legitimacy, Peace Operations and Global-Regional Security Linnéa Gelot,2012-08-21 At the turn of the century the

regional global security partnership became a key element of peace and security policy making This book investigates the impact of the joint effort made by the African Union AU and the United Nations UN to keep the peace and protect civilians in Darfur This book focuses on the collaboration that takes place in the field of conflict management between the global centre and the African regional level It moves beyond the dominant framework on regional global security partnerships which mainly considers one sided legal and political factors Instead new perspectives on the relationships are presented through the lens of international legitimacy The book argues that the AU and the UN Security Council fight for legitimacy to ensure their positions of authority and to improve the chances of success of their activities It demonstrates in regard to the case of Darfur why and how legitimacy matters for states international organisations and also for global actors and local populations Legitimacy Peace Operations and Global Regional Security will be of interest to students and scholars of International Relations African Security and Global Governance Social Justice and Deep Participation Paula Donnelly Roark,2014-11-24 Knowing what deep participation is and how it works can make a critical difference in solving 21st century economic political and social problems This book provides a new approach to hands on change and begins formulation of a participatory social theory promising greater prosperity and justice for all *Confronting Genocide* René Provost,Payam Akhavan,2010-11-11 Never again stands as one the central pledges of the international community following the end of the Second World War upon full realization of the massive scale of the Nazi extermination programme Genocide stands as an intolerable assault on a sense of common humanity embodied in the Universal Declaration of Human Rights and other fundamental international instruments including the Convention on the Prevention and Punishment of the Crime of Genocide and the United Nations Charter And yet since the Second World War the international community has proven incapable of effectively preventing the occurrence of more genocides in places like Cambodia Yugoslavia Rwanda and Sudan Is genocide actually preventable or is ever again a more accurate catchphrase to capture the reality of this phenomenon The essays in this volume explore the complex nature of genocide and the relative promise of various avenues identified by the international community to attempt to put a definitive end to its occurrence Essays focus on a conceptualization of genocide as a social and political phenomenon on the identification of key actors Governments international institutions the media civil society individuals and on an exploration of the relative promise of different means to prevent genocide criminal accountability civil disobedience shaming intervention **The Struggle for South Sudan** Luka Biong Deng Kuol,Sarah Logan,2018-11-29 South Sudan the world s youngest country has experienced a rocky start to its life as an independent nation Less than three years after gaining independence in 2011 following a violent liberation war the country slid back into conflict In the wake of infighting within the ruling Sudan People s Liberation Movement SPLM violence erupted in South Sudan s capital Juba in December 2013 The conflict pitted President Salva Kiir s predominantly Dinka presidential guard against Nuer fighters loyal to the former Vice President Riek Machar As fighting spread across the country it has taken on an increasingly ethnic nature Ceasefires have

been agreed but there have been repeated violations by all sides Today the conflict continues unabated and the humanitarian situation grows ever more urgent This book analyses the crisis and some of its contributing factors The contributors have worked on South Sudan for a number of years and bring a wealth of knowledge and different perspectives to this discussion Providing the most comprehensive analysis yet of South Sudan s social and political history post independence governance systems and the current challenges for development this book will be essential reading for all those interested in the continuing struggle for peace in South Sudan

Black Damage Femi Akomolafe,2016-07-04 Africa and black communities across the world are undoubtedly poor and dysfunctional Political and economic experts have attributed Africa s problems to factors such as corruption and the absence of strong institutions The dysfunctionalities in African diaspora are usually attributed to broken family structure This book demonstrates however that these factors are not the causes of Africa s and its diasporas woes but are symptoms of more fundamental problems Using empirical and qualitative studies Black Damage highlights the origins of the endless socio economic miseries of Africa and global black communities It shows that the plight of Africa and its diasporas are interwoven hence it addresses them concurrently Based on more than ten years of research and insight as an African living in the UK diaspora Femi Akomolafe takes readers through 500 years of history to uncover the root causes of the current predicaments of black communities across the globe Solutions are provided

African peace Kathryn Nash,2021-02-09 African regional organizations have played leading roles in constructing collective conflict management rules for the continent but these rules or norms have not been static Currently the African Union AU deploys monitors authorizes peace support operations and actively engages to resolve internal conflicts Just a few decades ago these actions would have been deeply controversial under the Organization of African Unity OAU What changed to allow for this transformation in the way the African regional organization approaches peace and security African peace examines why the OAU chose norms in 1963 that prioritized state security and led to a policy of strict non interference even in the face of destabilizing violence and why the AU chose very different norms leading to a disparate conflict management policy in the early 2000s Even if the AU s capacity to respond to conflict is still developing this new policy has made the region more willing and capable of responding to violence Nash argues that norm creation largely happened within the African context and international pressure was not a determinant factor in their evolution The role of regions in the international order particularly the African region has been under theorized and under acknowledged and this book adds to an emerging literature that explores the role of regional organizations in the Global South in creating and promoting norms based on their own experiences and for their own purposes

Global Democracy and Sustainable Jurisprudence Walter F. Baber,Robert V. Bartlett,2009-06-12 A proposal for a philosophical foundation and a realistic deliberative mechanism for creating a transnational common law for the environment In Global Democracy and Sustainable Jurisprudence Walter Baber and Robert Bartlett explore the necessary characteristics of a meaningful global jurisprudence a jurisprudence that would

underpin international environmental law Arguing that theories of political deliberation offer useful insights into the current democratic deficit in international law and using this insight as a way to approach the problem of global environmental protection they offer both a theoretical foundation and a realistic deliberative mechanism for creating effective transnational common law for the environment Their argument links elements not typically associated abstract democratic theory and a practical form of deliberative democracy the legitimacy imparting value of deliberative democracy and the possibility of legislating through adjudication common law jurisprudence and the development of transnational environmental law and conceptual thinking that draws on Deweyan pragmatism Rawlsian contractarianism Habermasian critical theory and the full liberalism of Bohman Gutmann and Thompson Baber and Bartlett offer a democratic method for creating interpreting and implementing international environmental norms that involves citizens and bypasses states an innovation that can be replicated and deployed across a range of policy areas Transnational environmental consensus would develop through a novel model of juristic democracy that would generate legitimate international environmental law based on processes of hypothetical rule making by citizen juries This method would translate global environmental norms into international law law that unlike all current international law would be recognized as both fact and norm because of its inherent democratic legitimacy
