Education Deborah Gist describes the book as an invaluable resource that will help educators re imagine what our schools can look like and what our students can accomplish Unleashing Greatness – a strategy for school improvement David Hopkins,2024-06-21 There is a paradox at the heart of contemporary school improvement and system change in education Why is it that despite the phenomenal increase in our recent knowledge about what works in schooling standards still lag behind expectations and school level performance is far too variable Unleashing Greatness addresses this paradox and concludes that unless we focus unrelentingly on the quality of teaching in both our small and large scale reform efforts current practice will never meet society s expectations Unleashing Greatness is a compilation of David Hopkins writing into one concise manual to provide an eight step strategy for unleashing greatness Introducing a rational and conceptual framework for pedagogic improvement that has the potential for generating an increasingly specific language for teaching and learning this book significantly aids consistency and precision in the quest for both excellence and equity for all students Written for school improvement activists particularly those who work in laboratory schools or who wish to emulate that ethos and way of working the author himself has located his professional practice for over forty years as well as this book in the middle of that triangle bounded by the vertices of practice research and policy Education Professions; a Report on the People who Serve Our Schools and Colleges United States. Office of Education,1969 Making Play Work Robert Halpern,2003-01-01 After school programs are becoming an important developmental support for low and moderate income children This book describes the historical development current status and critical issues facing these programs Divided into historical eras for easy reference the text examines The evolution of after school programs and their role in the lives of children providing a framework for reflecting on broader contemporary issues such as the effects of poverty on children in the United States The rationales for and objectives of these programs and how both were shaped by prevailing societal ideas about children Patterns of sponsorship and staffing describing daily routines and exploring the nature of children s experiences in different kinds of programs The relationship between after school programs and schools analyzing how these programs have responded to the dilemma of balancing children s needs for guidance and supervision with their equally important need for spontaneity and self expression Current directions and expectations for the future of after school programs **Education Professions** United States. Office of Education,1971 Research in Education ,1970 **Design Strategy** Nancy C. Roberts,2023-11-14 A new approach to addressing the contemporary world s most difficult challenges such as climate change and poverty Conflicts over the problem and the solution plague the modern world and land problem solvers in what has been called wicked problem territory a social space with high levels of conflict over problems and solutions In Design Strategy Nancy C Roberts proposes design as a strategy of problem solving to close the gap between an existing state and a desired state Utilizing this approach designers and change agents are better able to minimize self defeating conflicts over problems and solutions break the logjam of opposition and avoid the traps that lock problem solvers

into a never ending cycle of conflict Design as a field continues to grow and evolve but Design Strategy focuses on three levels of design where wicked problems tend to lurk strategic design of private and public organizations systemic design of networked and overlapping economic technical political and social subsystems and regenerative design of life giving realignment between humanity and nature Within this framework Roberts presents refreshingly interdisciplinary case studies that integrate theory and practice across diverse fields to guide professionals in any domain from business and nonprofit organizations to educational and healthcare systems and finally offers hope that humanity can tackle the existential challenges we face in the twenty first century **Resources in Education** ,1996-04 Developing a Research Strategy for Suicide Prevention in the Department of Defense Rajeev Ramchand,2014-09-22 To support U S Department of Defense DoD efforts to create a strategic plan for suicide prevention research a RAND study examined the current research DoD s strategic needs and ways to narrow the research practice gap in disseminating findings **Instructor** ,1973-02
