Topping,Céline Buchs,David Duran,Hilde van Keer,2017-03-31 Peer learning allows a positive use of differences between pupils turning them into learning opportunities Yet education professionals often remain unfamiliar with the principles necessary to guarantee its effectiveness The aim of this book is to help practitioners establish well structured and effective peer learning projects using a variety of methods It introduces and defines cooperative learning mutual peer interaction and peer tutoring directional peer interaction outlining general organisational principles that will help practitioners implement peer learning in either of these forms The authors consider how to prepare and train learners to undertake their roles effectively and how to organise and monitor the process of interaction as it is happening They then look at how these systems

actually operate in the classroom exploring how the organisational principles work in practice and giving many practical examples Subsequently three successive chapters consider how to structure peer interactions in cooperative learning same age peer tutoring and cross age peer tutoring Finally the advantages and problems and the potential and challenges of peer learning are examined The book should be read in stages with each part being able to be read on its own thus providing time for reflection Within each part readers can choose to focus on cooperative learning or peer tutoring The successive focuses on definitions general principles of implementation and practical issues of implementation should help practitioners build their skills and confidence Many choices between methods are described and when teachers are confident in one method they may then consider trying a new method It is the authors hope that the book will become a model for peer learning by sharing with readers the skills of other practitioners and thereby helping all children to develop to their full potential
