Cambridge Controversies in Capital Theory Jack Birner, 2002-02-21 The Cambridge Controversies in Capital Theory discusses the main contributions to the controversy in a series of case studies It gradually develops a methodological model of idealizations that explains both the process of the debate and the historical ironies surrounding it revealing that the surrounding confusion was due to the internal dynamics of the debate rather than to ideological differences Economists were mainly engaged in attempts to solve local problems often of a highly technical nature This plus the use of mathematics led them to confuse different kinds of idealizations and to drift away from the global problems that were at stake

The New Human Capital Strategy Bradley W. Hall, 2008 It is often said that the only true source of sustained competitive advantage is people But what does that mean and how can this be measured and managed How many organizations know whether their human capital outperforms their competitors or even whether it improves year over year And what is the strategy for continually improving that performance The New Human Capital Strategy is a roadmap for delivering measurable business results by systematically improving the performance of those in roles most important to customers and shareholders Proposing a radical shift in the way organizations measure and manage their people the book asserts that competitive advantage is a function of four areas of strength Effective executive teams leaders who deliver results outperforming competitors in key positions and workforce performance Using examples research and metrics this essential guide provides readers with a system for ensuring that their people are more valuable this year than

the last *Towards a U.S. Army Officer Corps Strategy for Success* Casey Wardynski, David Stephen Lyle, Michael J. Colarusso, 2010 The U S Army has always touted itself as a capstone developmental experience and still does so today You made them strong we ll make them Army Strong The Army is almost universally acknowledged as an organization that powerfully develops talent in areas such as leadership teamwork behavior work ethics adaptability fitness and many others Yet despite this well earned reputation the Army must remain vigilant Authorized strength and inventory mismatches an inverse relationship between responsibility and formal developmental time and sparse non operational development opportunities are serious challenges that the Army must address Developing talent is important in all high performing organizations but it is particularly critical to the Army for several reasons First the mission of fighting and winning wars requires truly championship level talent America s national security depends on it Second Americans entrust the very lives of their sons and daughters to the Army they deserve to be led by superstars And third limited lateral entry into midcareer and senior level officer positions means the Army cannot rely upon poaching talent from outside organizations as corporate America does Instead the Army must retain and continuously develop its entrylevel talent to meet present and future demands Army officers are hungry for the development needed to reach their full potential and perform optimally When they do not get it they seek it in the private sector This is why officer developmental programs must be tailored to the needs of every talented individual In this way the Army can both deepen and broaden its overall talent distribution mitigating risk in an increasingly uncertain and rapidly changing operating environment Current practice however generally shunts officers down conventional career paths and through standardized gates regardless of their unique talents experience or needs Meeting future challenges may well require a new way of doing business a comprehensive developmental strategy rooted in sound theory Several pioneers in the human capital field have provided a ready foundation for such a strategy Their work demonstrates the criticality of continuing education genuinely useful evaluations and properly valued signals to the creation of an outstanding developmental climate Considering officer development within this context moves the Army beyond a focus upon formal training and education While these are certainly important managing the nexus of individual talents and rapidly changing organizational requirements calls for careful attention to many other developmental factors These include professional networks mentorship and peer relationships tenure individual learning styles as well as diversity of thought experience and culture Lastly to reap the full benefit of any developmental strategy the Army must capture information on the multitude of talents that its officers possess The uniqueness of each individual cannot be captured via skill identifiers and career field designations alone Instead the Army needs a mechanism to track talent development over time gauging both its breadth and depth Only then will it be able to effectively employ talent the subject of the next and final monograph in this series **Towards a United States Army Officer Corps Strategy for Success** , *Gentrification as a Global Strategy* Abel Albet, Núria Benach, 2017-07-14 This book memorializes the work of one of Geography s leading critical thinkers and a

American Sea Power and the Obsolescence of Capital Ship Theory R.B. Watts,2015-11-27 Since the beginning of the 20th century the United States has sought to achieve Admiral Alfred Thayer Mahan s vision of command of the sea using large battle fleets of capital ships This strategy has been generally successful no force can oppose the U S Navy on the open seas Yet capital ship theory has become increasingly irrelevant Globally irregular warfare dominates the spectrum of conflict especially in the aftermath of 9 11 Fleet engagements are a thing of the past and even small scale missions that rely on capital ships are challenged by irregular warfare In a pattern evident since World War II the U S Navy has attempted to adapt its capital ship theory to irregular conflicts with mixed results before returning to traditional operations with little or no strategic debate This book discusses the challenges of irregular warfare in the 21st century and the need for U S naval power to develop a new strategic paradigm **CIMA Official Learning System Financial Strategy** John

Making Strategy Count in the Health and Human Services Sector Michael Mortell, Tine Hansen-Turton, 2013-12-06 This is the first guide to achieving long term impact and social change by employing critical strategies in the health and human services sector. It is based on lessons from a learning lab of 20 human services organizations and their chief strategy officers who as part of the Strategy Counts initiative engineered significant improvements in their ability to adjust to change, reap the benefits of more data driven decisions, innovate in ways that have meaningful impact and establish fruitful partnerships with companies, communities and government. The book is based on the findings of a long term pilot project, the Alliance for Children and Families Strategy Counts initiative, which focused on enhancing the social impact of human services organizations by increasing their reliance on strategy and its effective deployment throughout the entire organization. Included among these findings are those tools and methods that have the greatest potential to help nonprofits effectively anticipate emerging market forces and adapt strategies accordingly.
