

Understanding Structural Adjustment

Much of the policy of structural adjustment can be understood within the context of the growing power of neo-liberalism. Neo-liberal adjustment is based on a number of ideological assumptions:

- Post-colonial states are inefficient barriers to capital
- Labour is too expensive
- Social programs of states mean that the public is 'living beyond its means'
- State investment in the social sector deflects from capital accumulation and constitutes undue interference in the economic sphere (The state 'crowding out' the private sector)

In response, the program would require the state to:

1. Reduce public sector in the economy
2. Reduce subsidies to farmers and rural industries
3. Reduce subsidies and support to struggling manufacturing industries
4. Reduce subsidies to a number of other sectors
5. Reduce public sector social expenditure, reduce social welfare provision, reduce expenditure
6. Reduce international trade and services provision
