Strategy A Business Unit Stimulation:

Strategy Deployment in Business Units Maik Schlickel, 2013-01-24 This book reveals and presents the root causes that lead to varying improvement performances across different locations of a global positioned manufacturing organization. Conducting a multiple case study analysis of manufacturing sites around the world, the author found that the quality of the strategy deployment process is vital, especially when it is clear to all affected employees a situation we refer to as strategy cascading. But having a sound strategy cascading alone is not enough. The author worked out that a company which achieves to align its sound strategy cascading with the company context and leadership style of its top management team is likely to realize more operations improvements than do companies that missed to do so. **The Boston Consulting Group on**

Strategy Carl W. Stern, Michael S. Deimler, 2012-06-14 A collection of the best thinking from one of the most innovative management consulting firms in the world. For more than forty years The Boston Consulting Group has been shaping strategic thinking in business. The Boston Consulting Group on Strategy offers a broad and up to date selection of the firm's best ideas on strategy with fresh ideas, insights and practical lessons for managers, executives and entrepreneurs in every industry. Here's a sampling of the provocative thinking you'll find inside. You have to be the scientist of your own life and be astonished four times at what is, what always has been, what once was and what could be. The majority of products in most companies are cash traps. They are not only worthless but a perpetual drain on corporate resources. Use more debt than your competition or get out of the business. When information flows freely, reputation more than reciprocity becomes the basis for trust. As a strategic weapon, time is the equivalent of money, productivity, quality, even innovation. When brands become business systems, brand management becomes far too important to leave to the marketing department. The winning organization of the future will look more like a collection of jazz ensembles than a symphony orchestra. Most of our organizations today derive from a model whose original purpose was to control creativity. Rather than being an obstacle, uncertainty is the very engine of transformation in a business, a continuous source of new opportunities. IP assets lack clear property lines. Every bit of intellectual property you can own comes with connections to other valuable innovations.
