*Strategic Managerial Accounting - a Primer for the IT Professional* Gopal Saxena, 2017-01-01

**Strategic Managerial Accounting - A Primer for the IT Professional** Gopal Saxena, 2017-07-12 This book probably the first written from the perspective of software professionals attempts to introduce them to the mysteries of strategic managerial accounting SMA The common view in the industry is that accounting is for the accountants despite the fact that IT professionals are regularly confronted by financial situations such as project pricing performance measurement risk estimation costs allocation etc While it is desirable and even necessary that every proposal be vetted by respective specialists the speed and reliability of the process could improve if the people who originate the proposal had knowledge of the fundamentals that go into the decision making Unfortunately most books on management accounting whether strategic or otherwise are written from the perspective of the manufacturing industry The IT and services industry on the other hand has a unique cost structure quite distinct from manufacturing which needs to be dealt with from a different perspective This book focuses on SMA in context of the IT software industry and seeks to equip the IT professional with some basics of SMA to assist them in making more informed decisions

**Management Accounting Al Bhimani, Michael Bromwich, 2009-09-16** Management Accounting is part of the celebrations to mark CIMA's 90th anniversary in 2009. It looks at the development of cost and management accounting from the founding of the Institute to today. It considers a number of immediate challenges to management accountants and surveys a range of issues and challenges that will likely affect management accounting thought and practice in the future. The authors examine the possibilities for accountants to widen their focus and become more familiar with the enterprise technology determining their organisations cost structures and with the effects of multiple production in various locations such as economies or diseconomies of scale. Such change may require the alteration of traditional cost models used by accountants to become more nuanced. The book suggests how this may be accomplished and highlights the need for management accountants to work as part of management teams throughout the organisation as business partners rather than remain grounded in specialist information provision roles. Alnoor Bhimani is Professor of Management Accounting at the London School of Economics. He is also a Certified Management Accountant as well as an author of 15 books and over 100 articles. Michael Bromwich was CIMA's Professor of Accounting and Financial Management at the London School of Economics and Political Science 1985 to 2006, now Emeritus. He is a Past President of CIMA 1987-88 and currently serves on CIMA's Technical Committee. A unique survey of 90 years of CIMA research. Analyses the research to determine future challenges for management accounting and business practices. Charts the history of management accountancy and business practice over nearly 100 years.
