Beyond Strategy Michael Moesgaard Andersen, Flemming Poulfelt, 2014-05-23 Why is it that some companies turn out to be more successful when doing the opposite of what is prescribed in many of the current books on management and strategy Interestingly many of the companies depicted as very successful companies in the standard literature end up not faring well over time probably because they somehow end up in a dangerous autopilot mode What this suggests is that the conventional literature cookbook isn't telling us the whole story Even if companies have temporarily developed from an ugly duckling to a white swan the popular recipes for success may be clipping such companies wings Conversely companies adhering to disruptive business models are seen to be more agile and to possess a higher degree of actionability Such next generation companies are labeled black swans They thrive because they are bold and embrace the great unknowns of tomorrow with open minds and eyes At the same time they are able to take advantage of incumbents fears risk aversion and blindness to what's coming *Beyond Strategy* delves into the inner workings of such black swans as Apple Aravind Emirates Huawei Natura Ryanair and Tata and addresses the rise and fall of Nokia The authors provide explosive evidence of black swan companies working against the norms to enter uncharted waters
