However, with countless brands vying for the customer's attention, the ability to create a demand for a product and subsequently supply that demand is often the key to a business's success. There is a need for studies that seek to understand the complementary roles of an organization's sales force and distribution team to ensure relevancy in today's globalized world. *Sales and Distribution Management for Organizational Growth* is a pivotal reference source that provides vital research on the organization of sales and the sales force, their geographic deployment and distribution and channel management, including how to develop customer-oriented distribution systems. While highlighting topics including expense control, personnel training and channel design, this book is ideally designed for business students, marketing professionals, executive members, finance analysts, operations employees, academicians, industry professionals, researchers and students seeking current research on implementing sales strategy and distribution systems to maximize profits and remain a marketplace competitor.

Managing the Supply Chain J.L. Gattorna, David Walters, 1996-08-16 This text takes an updated view of the issues involved in supply chain management in today's business environment. In the 1990s, many businesses have gone through a number of changes, in particular through focusing on core activities and divesting themselves of many of the support functions traditionally carried out in-house. This development has led to the necessity for a broader concept of logistics that embraces the functions of both suppliers and customers into an integrated supply chain. The consequence of this is that the fundamental disciplines of logistics management must be reviewed and modified. Within this framework, the text addresses topics such as Value chain analysis, Activity-based costing, Strategic partnerships and alliances, International operations, Optimisation, Best practice and benchmarking. The book is ideal for students and practitioners in the field of logistics and supply chain management.
