Issues of Human Computer Interaction Anabela Sarmento, 2005-01-01 Human Computer Interaction HCI has its roots in the main areas of industrial engineering, human factors, and cognitive psychology, with the focus on the development of user-friendly IT. Traditionally, the research in this area has emphasised the technological aspect of this relationship. The computer. More recently, other aspects concerning the organizational, social, and human context also began to be considered. The Human Today one can say that any attempt to facilitate the relationship between the machine and the user must consider not only the technological perspective e.g. promote the usability but also, for instance, the way the user is going to use the technology and his or her purpose as well as the social and cultural context of this use. The Human and the Computer

*The Business of Projects* Andrew Davies, Michael Hobday, 2005-10-27 The Business of Projects broke ground when it was first published in 2005 by showing how leading businesses create and implement projects to drive strategy and innovation. Projects are used to coordinate activities with customers and suppliers and ensure that organisations become more dynamic and adaptable. The book extends the resource-based view of the firm to focus on the business lessons learned from the design and production of high-value complex products and systems CoPS which have always been project-based. As well as frameworks and management tools, it provides case studies of high-technology industries such as telecommunications, flight simulation, and medical devices to show how projects are used to achieve strategic objectives, perform systems integration, organise productive activities, manage software, achieve organisational learning, and deliver solutions for customers. This book is essential reading for project professionals, academics, students, engineers, managers, and policy makers seeking a strategic, innovative perspective on projects
