## **Stratigraphic Modeling And Interpretation Geophysical Principles And Techniques Series Continuing Education Course Notes No 13:**

Stratigraphic Modeling and Interpretation Norman S. Neidell, 1979 Stratigraphic interpretation of seismic data requires that the seismic information be expressed in geological terms The strictly geological view of the earth is developed from surface observations guiding principles of geological evolution and subsurface information from bore holes Seismic measurements on the other hand define in some sense the subsurface geometry and give estimates of the acoustic impedance which is related to the rock velocities and densities

**Carbonate Reservoir Characterization: A Geologic-Engineering Analysis, Part II** S.J. Mazzullo, H.H. Rieke, G.V. Chilingarian, 1996-11-22 This second volume on carbonate reservoirs completes the two volume treatise on this important topic for petroleum engineers and geologists Together the volumes form a complete modern reference to the properties and production behaviour of carbonate petroleum reservoirs The book contains valuable glossaries to geologic and petroleum engineering terms providing exact definitions for writers and speakers Lecturers will find a useful appendix devoted to questions and problems that can be used for teaching assignments as well as a guide for lecture development In addition there is a chapter devoted to core analysis of carbonate rocks which is ideal for laboratory instruction Managers and production engineers will find a review of the latest laboratory technology for carbonate formation evaluation in the chapter on core analysis The modern classification of carbonate rocks is presented with petroleum production performance and overall characterization using seismic and well test analyses Separate chapters are devoted to the important naturally fractured and chalk reservoirs Throughout the book the emphasis is on formation evaluation and performance This two volume work brings together the wide variety of approaches to the study of carbonate reservoirs and will therefore be of value to managers engineers geologists and lecturers
