Geology of the Appalachian—Caledonian Orogen in Canada and Greenland Harold Williams, 1995 This volume focuses on the Canadian Appalachian region The chapter on the East Greenland Caledonides stands alone and there is no attempt to integrate the geological accounts of the two far removed regions Rocks of the Canadian Appalachian region are described under four broad temporal divisions lower Paleozoic and older middle Paleozoic upper Paleozoic and Mesozoic The rocks of these temporal divisions define geographic zones belts basins and graben respectively The area is of special interest because so many modern concepts of mountain building are based on Appalachian rocks structures

Regional Stratigraphy of North America W.J. Frazier, D.R. Schwimmer, 2013-11-11 An early reviewer of this book stated that he had difficulty assessing its marketability because it falls between the cracks of geological literature We have designed this book to meet a need of modern geology namely a single source providing both detailed and synoptic stratigraphy of the various regions of North America through geological time Shortly after beginning work on such a book we realized why it had not yet been written it required six years of effort assimilation of an incredible amount of information and two years additional work to cut the volume down to publishable size Further by the time the final chapter was written the first few were already out of date Nevertheless the book lies in front of you It is intended to serve several purposes As a textbook it will serve the following courses Regional stratigraphy Sedimentary tectonics Regional tectonics Advanced historical geology Survey level paleontology Obviously not all portions of the book are relevant to all of the above courses We assume the reader will retain this book after the particular course is done and will use it as a reference book Hopefully others will obtain the book solely for reference purposes We believe it will be especially useful for the working geologist or academic geologist seeking generalized and some moderately detailed information about a region or geological time interval which is unfamiliar
