Street Level Bureaucracy Dilemmas Of The Individual In Public Services Publications Of Russell Sage Foundation:

Street-Level Bureaucracy, 30th Anniversary Edition Michael Lipsky, 2010-04-08 First published in 1980 Street Level Bureaucracy received critical acclaim for its insightful study of how public service workers in effect function as policy decision makers as they wield their considerable discretion in the day to day implementation of public programs Three decades later the need to bolster the availability and effectiveness of healthcare social services education and law enforcement is as urgent as ever In this thirtieth anniversary expanded edition Michael Lipsky revisits the territory he mapped out in the first edition to reflect on significant policy developments over the last several decades Despite the difficulties of managing these front line workers he shows how street level bureaucracies can be and regularly are brought into line with public purposes Street level bureaucrats from teachers and police officers to social workers and legal aid lawyers interact directly with the public and so represent the frontlines of government policy In Street Level Bureaucracy Lipsky argues that these relatively low level public service employees labor under huge caseloads ambiguous agency goals and inadequate resources When combined with substantial discretionary authority and the requirement to interpret policy on a case by case basis the difference between government policy in theory and policy in practice can be substantial and troubling The core dilemma of street level bureaucrats is that they are supposed to help people or make decisions about them on the basis of individual cases yet the structure of their jobs makes this impossible Instead they are forced to adopt practices such as rationing resources screening applicants for qualities their organizations favor rubberstamping applications and routinizing client interactions by imposing the uniformities of mass processing on situations requiring human responsiveness Occasionally such strategies work out in favor of the client But the cumulative effect of street level decisions made on the basis of routines and simplifications about clients can reroute the intended direction of policy undermining citizens expectations of evenhanded treatment This seminal award winning study tells a cautionary tale of how decisions made by overburdened workers translate into ad hoc policy adaptations that impact peoples lives and life opportunities Lipsky maintains however that these problems are not insurmountable Over the years public managers have developed ways to bring street level performance more in line with agency goals This expanded edition of Street Level Bureaucracy underscores that despite its challenging nature street level work can be made to conform to higher expectations of public service

Street-Level Bureaucracy Michael Lipsky, 1983-06-29 Street Level Bureaucracy is an insightful study of how public service workers in effect function as policy decision makers as they wield their considerable discretion in the day to day implementation of public programs

Professional Disobedience in Probation Asbjørn Storgaard, 2025-06-13 This book comprises an in depth and highly inclusive ethnographic study of daily life in two local Danish probation offices With a special emphasis on manual based rehabilitative interventions the book explores the interactions between probation officers and citizens on probation serving conditional sentences or performing community service as well as the professionals rationales behind their rehabilitative efforts By presenting ethnographic findings that indicate a divergence between the envisioned trust based interactions and the reality of manual based scripted practices within the Danish probation service the analyses reveal how rehabilitative interactions may seem choreographed with roles predetermined by an asymmetric social hierarchy This framework portrays the client as inherently obstinate unpredictable and cast as an irresponsible subject Despite these challenges the book underscores probation officers genuine belief in the transformative power of motivational programs More precisely it assesses the potential for manual based or scripted rehabilitative interventions to genuinely inspire participatory citizenship among disenfranchised clients Building on these empirically informed discussions the book

ultimately endeavors to provide a positive and instructive conceptualization of the diverse activities in which probation officers acknowledging the limitations of their scripted interactions with clients appear to transgress their manual based mandate and perform professional disobedience Given the broad applicability of the concept of professional disobedience extending beyond probation to other social service practices navigating the intersection of help and control this book is intended for a wide array of researchers students practitioners and policymakers with an interest in punishment disenfranchisement and rehabilitation This book is essential reading for those engaged in probation criminal justice ethnography and Nordic criminology

Reluctant Partners Robert P. Stoker, 2010-11-23 Constitutional principles at the core of the United States government divide authority between market and state and within the structure of the state itself This diffusion of authority is valuable because it defends against the excesses of national government causing federal policy initiatives to be more attuned to the concerns of local jurisdictions and creating a context in which free enterprise may flourish However this diffusion of authority weakens the control that federal officials enjoy over resources vital to the implementation of national policy To implement their plans federal policy formulators must often call upon autonomous participants such as state or local governments advocacy groups or commercial interests When federal policy challenges the perspectives interest or priorities of these participants they become reluctant partners These implementation participants enjoy substantial autonomy making their cooperation in pursuit of federal policy goals uncertain and difficult to achieve How then can the federal government

secure the cooperation it needs to implement policy when the act of implementation empowers potential adversaries Reluctant Partners explores these problems and proposes strategies to reduce the impediments to cooperation and promote policy coordination Drawing upon theories of regime development and cooperation Stoker suggests the implementation regime framework to analyze the difficulties of realizing cooperation in the implementation process The framework is illustrated with numerous vignettes and two extensive case studies the National School Lunch Program and federal nuclear waste disposal policy Policy Work in Canada Michael Howlett, Adam Wellstead, Jonathan Craft, 2017-01-01 Policy Work in Canada is an in depth study into the levels of analytical capacity found within the federal and provincial governments as well as the non governmental sector By focusing on the individuals who craft public policy in Canada this collection of eighteen chapters broadens and deepens our understanding of policy development in Canada The contributors to this volume empirically examine such topics as the inherent characteristics of sophisticated policy analysis the constraints that influence the outcome or style of analysis the influence of policy analysis on democratic debate and lessons that can be learned from different jurisdictions within and outside of Canada Policy Work in Canada provides a pathway for academics and public managers alike to meet the challenges involved in crafting more nuanced and sophisticated public policy head on
