Siracusa, 2013-04-23 Written by two preeminent authors in the field this book provides an accessible global narrative of the nuclear arms race since 1945 that focuses on the roles of key scientists military chiefs and political leaders The first book of its kind to provide a global perspective of the arms race this two volume work connects episodes worldwide involving nuclear weapons in a comprehensive narrative fashion Beginning with a discussion of the scientific research of the 1930s and 1940s and the Hiroshima decision the authors focus on five basic themes political dimensions technological developments military and diplomatic strategies and impact The history of the international nuclear arms race is examined within the context of four historical eras America s nuclear monopoly America s nuclear superiority superpower parity and the post Cold War era Information about the historical development of the independent deterrence of Britain France and China as well as the piecemeal deterrence of newcomers Israel India Pakistan and North Korea is also included as is coverage of the efforts aimed at the international control of nuclear weapons and the diplomatic architecture that underpins the global nuclear non proliferation regime *Military Review*, 1978 [History of Acquisition in the Department of Defense, Volume 1](#) Elliott V. Converse, 2012-06-12 This volume is a history of the acquisition of major weapon systems by the United States armed forces from 1945 to 1960 the decade and a half that spanned the Truman and Eisenhower administrations following World War II These instruments of warfare aircraft armored vehicles artillery guided missiles naval vessels and supporting electronic systems when combined with nuclear warheads gave the postwar American military unprecedented deterrent and striking power 1 They were also enormously expensive The volume is organized chronologically with individual chapters addressing the roles of OSD the Army Navy and Air Force in two distinct periods The first roughly coinciding with President Truman s tenure covers the years from the end of World War II

through the end of the Korean War in 1953 The second spans the two terms of the Eisenhower presidency from 1953 through early 1961 The year 1953 marked a natural breakpoint between the two periods The Korean War had ended President Eisenhower and his defense team began implementing the New Look a policy and strategy based on nuclear weapons which they believed would provide security and make it possible to reduce military spending The New Look s stress on nuclear weapons along with the deployment of the first operational guided missiles and the rapid advances subsequently made in nuclear and missile technology profoundly influenced acquisition in the services throughout the 1950s and the remainder of the century As used in this study the term acquisition encompasses the activities by which the United States obtains weapons and other equipment In surveying the history of acquisition between 1945 and 1960 this study discusses or refers in passing to many of the hundreds of weapon system programs initiated by the services in that period but it is not a weapons encyclopedia Instead it investigates a few major programs in depth in the belief that such detailed examination best reveals the evolution of acquisition policies organizations and processes and the various forces influencing weapons programs

Professional Journal of the United States Army ,1978 *Quarterly Review of Military Literature* ,1978

Rearming for the Cold War, 1945-1960 Elliott Vanveltner Converse,2012 Book Description The first publication in a multivolume series on the history of the acquisition of major weapon systems by the Department of Defense author Elliott Converse presents a meticulously researched overview of changes in acquisition policies organizations and processes within the United States military establishment during the decade and a half following World War II Many of the changes that shaped the nature and course of weapons research and development production and contracting through the end of the century were instituted between 1945 and 1960 many of the problems that have repeatedly challenged defense policymakers and acquisition professionals also first surfaced during these years This study is the first to combine the histories of the Office of the Secretary of Defense OSD and the military services into one account The volume is organized chronologically with individual chapters addressing the roles of OSD the Army Navy and Air Force in two distinct periods **Great Power Security Cooperation** David W. Kearn,2014-12-18 This book explains the conditions under which great powers are likely to cooperate to improve their security by engaging in qualitative arms control In agreeing to limit or proscribe certain classes of weapons states will constrain their military capabilities and therefore decrease the threat they pose to potential adversaries Focusing on the expected military impact of technological change and the capacity of states to confidently monitor the activities of its negotiating partners it may be possible to forge lasting agreements that improves the security of the participating states However at other times the nature technological change may force states to engage in competitive behavior precluding cooperation and increasing the probability of conflict Examining a diverse set of cases including the Washington Naval Conference The World Disarmament Conference at Geneva the Baruch Plan for the International Control of Atomic Energy and the SALT I Accords including the ABM Treaty this volume presents a persuasive comprehensive and

interesting contribution to the literature on arms racing and arms control and should be of interest to students of international relations theory and security studies By presenting a theoretical informed model that explicitly links the security strategies of states to their choices about development and deployment of new weapons and consequently their willingness to engage in arms control cooperation this book provides an important refinement upon existing theoretical and historical approaches

Peace Studies Matthew Evangelista, 2005 The academic field of Peace Studies emerged during the Cold War to address the nature and sources of interstate and internal conflict and methods to prevent it and deal with its consequences

Fixing the Facts Joshua Rovner, 2011-07-26 What is the role of intelligence agencies in strategy and policy How do policymakers use or misuse intelligence estimates When do intelligence policy relations work best How do intelligence policy failures influence threat assessment military strategy and foreign policy These questions are at the heart of recent national security controversies including the 9 11 attacks and the war in Iraq In both cases the relationship between intelligence and policy broke down with disastrous consequences In Fixing the Facts Joshua Rovner explores the complex interaction between intelligence and policy and shines a spotlight on the problem of politicization Major episodes in the history of American foreign policy have been closely tied to the manipulation of intelligence estimates Rovner describes how the Johnson administration dealt with the intelligence community during the Vietnam War how President Nixon and President Ford politicized estimates on the Soviet Union and how pressure from the George W Bush administration contributed to flawed intelligence on Iraq He also compares the U S case with the British experience between 1998 and 2003 and demonstrates that high profile government inquiries in both countries were fundamentally wrong about what happened before the war
