Interactive Multimedia Learning Environments Max Giardina,2012-12-06 Multimedia environments suggest to us a new perception of the state of changes in and the integration of new technologies that can increase our ability to process information Moreover they are obliging us to change our idea of knowledge These changes are reflected in the obvious synergetic convergence of different types of access communication and information exchange The multimedia learning environment should not represent a passive object that only contains or assembles information but should become on one side the communication medium of the pedagogical intentions of the professor designer and on the other side the place where the learner reflects and where he or she can play with test and access information and try to interpret it manipulate it and build new knowledge The situation created by such a new learning environments that give new powers to individuals particularly with regard to accessing and handling diversified dimensions of information is becoming increasingly prevalent in the field of education The old static equilibrium in which fixed roles are played by the teacher including the teaching environment and the learner is shifting to dynamic equilibrium where the nature of information and its processing change depending on the situation the learning context and the individual s needs Caspian Energy Resources The Emirates

Center for Strategic Studies and Research,2000-08-23 The potentially rich energy resources of the Caspian region have proved to be a tantalizing magnet for nations oil companies and investors and this prospective oil bonanza has prompted intense media coverage As nations continually search for new supplies to replace those barrels of oil that are being depleted Caspian oil assumes significance because of its high quality and export potential How far will this potential be realized and to what extent will these resources become a substitute for Gulf oil In this volume a number of researchers and experts discuss the various dimensions of Caspian oil including its attractions the rationale and scope for foreign investment the complexities of the region s legal environment contentious pipeline issues regional political trends and the economic impact of Caspian oil on oil producers from the Arab Gulf countries and the world market Given the limits in the opportunities of developing means to exploit Caspian oil studies suggest that there is little prospect of serious competition to Gulf oil and that the market

control of the Arab Gulf producers may be relatively unaffected in the short or medium term However Caspian oil will be a significant addition to non OPEC output and may eventually threaten the predominant position of Gulf oil unless regional oil producers adopt more market oriented economic investment and pricing policies The Journal of Industrial and Engineering Chemistry ,1918
