Machines for Living Victoria Rosner, 2020-02-04 Changes in the routines of domestic life were among the most striking social phenomena of the period between the two World Wars when the home came into focus as a problem to be solved reimagined streamlined electrified and generally cleaned up Modernist writers understood themselves to be living in an epochal moment when the design and meaning of home life were reconceived Moving among literature architecture design science and technology *Machines for Living* shows how the modernization of the home led to profound changes in domestic life and relied on a set of emergent concepts including standardization scientific method functionalism efficiency science and others that form the basis of literary modernism and stand at the confluence of modernism and modernity Even as modernist writers criticized the expanding reach of modernization into the home they drew on its conceptual vocabulary to develop both the thematic and formal commitments of literary modernism Rosner's work develops a new methodology for interdisciplinary modernist studies and shows how the reinvention of domestic life is central to modernist literature

Russia Richard Anderson, 2015-11-15 This book offers a comprehensive account of Russia's architectural production from the late nineteenth century to the present explaining how its architecture was both shaped by and came to embody Russia's rapid cultural economic and social revolutions over the past century Richard Anderson looks at Russia's complex relationship to global architectural culture exploring the country's central presence in the Rationalism and Constructivism movements of the 1920s as well as its role as a key protagonist during the Cold War Looking deeply at Soviet

Russia he brings the relationship between architecture and socialism into focus through detailed case studies that situate buildings and architectural concepts within the socialist milieu of Soviet society He tracks the way Russian architectural institutions departed from the course of modernism being developed in capitalist countries and he reappraises the architecture of the Stalin era and the final decades of the USSR Finally he traces the influence of Soviet conventions on contemporary Russian architecture which is now a more heterogeneous mix of approaches and styles and how it made a lasting and little known impact on territories extending from the Middle East to Central Asia and into China A bold new assessment of Russia's architectural legacy and contemporary contributions this book is a fascinating exploration of a tumultuous place and the creativity that has come from it

Functional Planning of Elementary School Buildings Alice Barrows, 1937

The Historiography of Modern Architecture Panayotis Tournikiotis, 2001-02-27

The history of modern architecture as constructed by historians and key texts Writing according to Panayotis Tournikiotis has always exerted a powerful influence on architecture Indeed the study of modern architecture cannot be separated from a fascination with the texts that have tried to explain the idea of a new architecture in a new society During the last forty years the question of the relationship of architecture to its history of buildings to books has been one of the most important themes in debates about the course of modern architecture Tournikiotis argues that the history of modern architecture tends to be written from the present projecting back onto the past our current concerns so that the beginning of the story really functions as a representation of its end In this book the buildings are the quotations while the texts are the structure Tournikiotis focuses on a group of books by major historians of the twentieth century Nikolaus Pevsner Emil Kaufmann Sigfried Giedion Bruno Zevi Leonardo Benevolo Henry Russell Hitchcock Reyner Banham Peter Collins and Manfredo Tafuri In examining these writers thoughts he draws on concepts from critical theory relating architecture to broader historical models

Objects in Exile Robin Schuldenfrei, 2024-01-23

An essential examination of how emigration and resettlement defined modernism In the fraught years leading up to World War II many modern artists and architects emigrated from continental Europe to the United States and Britain The experience of exile infused their modernist ideas with new urgency and forced them to use certain materials in place of others modify existing works and reconsider their approach to design itself In *Objects in Exile* Robin Schuldenfrei reveals how the process of migration was crucial to the development of modernism charting how modern art and architecture was shaped by the need to constantly face and transcend the materiality of things Taking readers from the prewar era to the 1960s Schuldenfrei explores the objects these migr s brought with them what they left behind and the new works they completed in exile She argues that modernism could only coalesce with the abandonment of national borders in a process of emigration and resettlement and brings to life the vibrant postwar period when avant garde ideas came together and emerged as mainstream modernism Examining works by Walter Gropius L szl Moholy Nagy Lucia Moholy Herbert Bayer Anni and Josef Albers and others Schuldenfrei demonstrates the social impact of art objects produced in exile

Shedding critical light on how the pressures of dislocation irrevocably altered the course of modernism *Objects in Exile* shows how artists and designers forced into exile by circumstances beyond their control changed in unexpected ways to meet the needs and contexts of an uncertain world *The Socialist Life of Modern Architecture* Juliana Maxim, 2018-12-07 *The Socialist Life of Modern Architecture* is the first systematic architectural history of Romania under socialism written in English It examines the mechanisms through which modern architecture was invested with political meaning and in reverse how specific architectural solutions came to define the socialist experience Each of the book's three parts traces the historical development of one key aspect of Romania's architectural culture between the years 1949-1964 the planning and construction of housing districts in Bucharest the role of typification of design and standardization of construction in a project of cultural transformation the production and management of a folk architectural tradition Going beyond buildings and architects to consider the use of photography painting and novels as well as narrations of history and the formation of an ethnographic architectural heritage the author explores how buildings came to participate in the cultural imagination of socialism and became in fact a privileged medium of socialism Part of the growing interest in the significance of Soviet Bloc architecture this is an important contribution to the fields of architectural history cultural history and visual culture ***The Architect, the Cook and Good Taste*** Petra Hagen Hodgson, Rolf Toyka, 2007-03-29 Since time immemorial cooking and building have been among humanity's most basic occupations Both of them are rooted in necessity but both of them also possess a cultural as well as a sensory aesthetic dimension And while it is true that cooking is a transitory art form it gives expression to the periods of human cultural history just as architecture does Moreover both arts accord a central role to the materials employed Both involve measuring and proportioning shaping and designing assembling and composing This book pursues the astonishing parallels and deeply rooted connections between the art of building and that of cooking A variety of essays takes up questions of materiality and proportioning Attention will also be given to food cultivation and architecture to the places where meals are prepared as well as a range of different culinary spaces With articles by Annette Gigon Stanislaus von Moos Claudio Silvestrin Ian Ritchie and others
