Astronomy and Astrophysics Abstracts which has appeared in semi annual volumes since 1969 is devoted to the recording summarizing and indexing of astronomical publications throughout the world It is prepared under the auspices of the International Astronomical Union according to a resolution adopted at the 14th General Assembly in 1970 Astronomy and Astrophysics Abstracts aims to present a comprehensive documentation of literature in all fields of astronomy and astrophysics Every effort will be made to ensure that the average time interval between the date of receipt of the original literature and publication of the abstracts will not exceed eight months This time interval is near to that achieved by monthly abstracting journals compared to which our system of accumulating abstracts for about six months offers the advantage of greater convenience for the user Volume 8 contains literature published in 1972 and received before March 15 1973 some older literature which was received late and which is not recorded in earlier volumes is also included **The Soviet-American Conference on Cosmochemistry of the Moon and Planets** John Howard Pomeroy, Norman J. Hubbard, 1977 The Soviet-American Conference on Cosmochemistry of the Moon and Planets John Howard Pomeroy, Norman J. Hubbard, 1977 Super-Girls of the Future Charlotte J. Fabricius, 2023-10-16 Super Girls of the Future Girlhood and Agency in Contemporary Superhero Comics investigates girl superheroes published by DC and Marvel Comics in the first two decades of the twenty first century asking who the new and improved super girls are and what potentials they hold for imagining girls as agents of change in the genre as well as its socio cultural context As super girls have grown increasingly numerous and diverse since the turn of the millennium they provide an opportunity for reconsidering representations of gender and power in the superhero genre This book offers the term agentic embodiment as an analytical tool for critiquing the body politics of superhero comics particularly concerning youth femininity whiteness and violence Grounded in comics studies and informed by feminist cultural studies the book contributes a critical and hopeful perspective on the diversification of a genre often written off as irredeemably conservative and patriarchal Super Girls of the Future is a key title for students and scholars of comics studies visual culture US popular culture and feminist criticism NASA EP. United States. National Aeronautics and Space Administration, 1982 **Report of the Pennsylvania Home Teaching Society and Free Circulating Library for the Blind** Pennsylvania Home Teaching Society and Free Circulating Library for the Blind, Philadelphia, 1904 List of books in Moon s type for the blind in reports for 1899 **Humanizing Humanity** Bidyut Chakrabarty, 2024-07-20 Humanizing Humanity is distinctively framed advocacy of the ways in which the concept of humanity has been defended by various ideologues of India like Tagore Gandhi and Ambedkar By grounding itself in the epistemology of intellectual history the book delineates how these three major thinkers visualised the ways in which society can be better humanized Such a process of humanization for these thinkers forms the bedrock of the trajectory in which

humanity may be preserved amidst intense authoritarianism and the violent quest for power by a small minority in the society. The book is an attempt at exploring the strands of intertextuality that exist when Tagore, Gandhi and Ambedkar's thinking is situated in the ontic and epistemic context of a few humans' tendency to destroy humanity and the efforts of another section to create conditions for its preservation. Bidyut Chakrabarty does this by comparing the ways in which the Federalist Papers of the United States of America and the Indian Constitution manifest as quintessential texts that uphold the principles of liberty, equality, justice and the protection of the weaker sections of society from structured strands of domination and exploitation.

Literature 1969, Part 2 Siegfried Böhme, Walter Fricke, Ulrich Güntzel-Lingner, Frieda Henn, Dietlinde Krahn, Gert Zech, 2012-12-06. *Astronomy and Astrophysics Abstracts*, which appears in semi-annual volumes, is devoted to the recording, summarizing and indexing of astronomical publications throughout the world. It aims to present a comprehensive documentation of literature in all fields of astronomy and astrophysics. Every effort will be made to ensure that the average time interval between the date of receipt of the original literature and publication of the abstracts will not exceed eight months. This time interval is near to that achieved by monthly issued abstracting journals, compared to which our system of accumulating abstracts for about six months offers the advantage of greater convenience for the user. Volume 2 contains literature published in 1969 and received before March 15, 1970; some older literature which was received late and which is not recorded in Volume 1 is also included. The authors of papers who have sent us abstracts on request have effectively contributed to the success of our service. We should like to express our gratitude to them. We acknowledge with thanks contributions to this volume by Dr J. Bouška who surveyed journals and publications in Czech language and supplied us with abstracts in English; by Dr B. Onderlicka, Brno, for providing English abstracts of Russian papers; and by the Commonwealth Scientific and Industrial Research Organization (CSIRO), Sydney, for providing titles and abstracts of papers on radio astronomy.
