Barczak, Tomasz Kafel, Pierpaolo Magliocca, 2021

PURPOSE The analysis of the literature shows that the attempts to conceptualize the strategic aspects of the network bring a significant impact on the development of research on organizational networks This article aims to analyze the new trends in strategic management and in particular on the possibility of exploring the network approach in strategic management through the existing literature and the presentation of the new contributions of the following articles published in the current issue

METHODOLOGY The article is descriptive in character thus it is based on a literature review and its constructive critics A narrative literature review was used to present the main assumptions and features of the network approach in strategic management along with an indication of emerging trends and new directions Also the identification of theoretical foundations for understanding the processes of strategic change in inter organizational networks and the proposition of the way to understand network strategy were presented

FINDINGS The research included in this issue shows that from a network perspective business strategy plays an important role in guiding the development of individual relationships and networks Exploring the network approach in strategic management allows one to adopt the category of network strategy which can be described through the coexistence of cooperation and competition

IMPLICATIONS FOR THEORY AND PRACTICE Considerations lead to the conclusion that the business strategy must be expressed in terms of potential changes in the network in which the company operates taking into account its current and selected position in the network Despite the fact that the current state of research on organizational networks in the theory of strategic management shows that this approach is already quite well established on the basis of the analysis of research results concerning the conceptualization of strategic aspects of the network the existing problems and limitations were identified

ORIGINALITY AND VALUE The main problems related to the exploration of the network approach and the resulting consequences for the definition of the network strategy were indicated Also the combination of an organizational and economic approach with the logic of competitive advantage and relational annuity The demonstration that the network perspective in strategic management allows for a more complete understanding of the strategic behavior of modern enterprises

Valtakoski Ilkka Kauranen The Evolution of Strategic Management: Challenges in Theory and Business Practice Tomasz Kafel, Bernard Ziębicki, 2021-01-01

Purpose Strategic management has been developing in business theory and practice for over 50 years. Presently it constitutes the main area of research interest in management science. The contemporary conditions of business operations create new challenges for strategic management such as the use of dynamic capabilities in strategy building, relational strategies, networking of organizations, technology development and automation of processes and global strategies. These challenges are often referred to as neostrategic management. The purpose of this publication is to present the findings of research concerning new strategic management concepts and challenges.

Methodology The main research method of this article was a narrative literature review. On the basis of the research, the development of the concepts as well as contemporary trends and challenges of strategic management were characterized. There is also a synthesis of the problems and research results presented in the articles in this special issue of JEMI.

Findings Various schools and approaches to strategy formulation have been created. They indicate different factors that allow for success in strategic management, such as setting long-term goals, selection of programs and their execution plans, planning, school connection of the enterprise with the environment, evolutionary school focusing attention on competitive advantage and achieved performance position, based school focus on one's own resources and competences, resource school use of opportunities and creating innovation, simple rules school, selection of the best option and orientation in business management, real options school, or eclectic perspectives integrating the listed approaches. The strategic management concept has two dimensions. The first dimension is related to the emergence of subsequent new strategic management concepts which often hark back to the previous schools and approaches. The second dimension of development applies to operationalization and adjustment of the previous concepts to the changing conditions.

Implications for theory and practice The paper characterizes the research results presented in the articles included in this JEMI issue. They deal with various problems and challenges in the field of strategic management such as the relationship between market dynamics, market orientation and performance of enterprises, the innovativeness of companies as a contemporary strategic orientation of companies, the strategy implementation and the management of the organization, change problems of strategic management, the development of the city, Originality and value. The problems presented in the study relate to challenges and new concepts in strategic management. They enrich the existing knowledge on the development of strategic management and also create inspiration for further research in this area.

Keywords evolution of the strategic management concept, neostrategic management, strategy implementation, success, market dynamism, strategic management of cities, innovation strategy.

Open Innovation Research, Management And Practice Joe Tidd, 2013-10-24 The concept of open innovation has become increasingly popular in the management and policy literature on technology and innovation However despite the large volume of empirical work many of the prescriptions being proposed are fairly general and not specific to particular contexts and contingencies The proponents of open innovation are universally positive but research suggests that the specific mechanisms and outcomes of open innovation models are very sensitive to context and contingency This is not surprising because the open or closed nature of innovation is historically contingent and does not entail a simple shift from closed to open as often suggested in the literature Research has shown that patterns of innovation differ fundamentally by sector firm and strategy Therefore there is a need to examine the mechanisms that help to generate successful open innovation In this book the authors contribute to a shift in the debate from potentially misleading general prescriptions and provide conceptual and empirical insights into the precise mechanisms and potential limitations of open innovation research and management practice
