

STRATEGIC SURVEY 1999/2000

Strategic Survey 1999

Neville Brown

Strategic Survey 1999 :

Strategic Survey 1999/2000, 2000 The Survey reviews and analyzes the key political economic and foreign policy developments and trends of 1999 and the first quarter of 2000 Articles covering regional security proliferation and military conflict form an accessible commentary invaluable for interpreting world wide strategic events **NATO and Peace**

Support Operations, 1991-1999 Henning Frantzen, 2004-12-17 This new book addresses the key question of how NATO and three of its member states are configuring their policies and military doctrines in order to handle the new strategic environment This environment is increasingly dominated by new wars more precisely civil wars within states and peacekeeping as the strategy devised by outside actors for dealing with them The book seeks to explain how this new strategic environment has been interpreted and how the new conflicts and peacekeeping have been fitted into defence and war key concepts in the field of security studies **Strategic Survey**, 1999 Oversight over aktuelle internationale forhold

China Review 1999 Chong Chor Lau, Xiao Geng, 1999 China has made great success in improving its foreign relations with other countries in 1998 Jiang Zemin's visit to the United States and Japan clearly showed that China would continually uphold its open door policy and economic reform It is significant to most economic analysts that China has still recorded 7.8% economic growth under the Asian financial crisis China Review 1999 the ninth volume of this series is an expert survey of China's major sectors of interest which critically summarizes the development of the previous year in core chapters covering politics the economy and social change This volume has several in depth presentations on political and social economic issues such as the Sino U S relations Mainland Taiwan relations the economic performance of 1998 all major concerns to those interested in the development of the People's Republic Additional studies describe rarely featured areas of Chinese society

Global Instability and Strategic Crisis Neville Brown, 2004-08-02 The author seeks to bring new perspectives to current debates and argues that control of the missile threats cannot be achieved without addressing ecological economic social and cultural elements in a stable world order **Korea after the Crash** Brian Bridges, 2012-10-12 Brian Bridges examines the impact on South Korea of the financial crisis of 1997 Covering events up to and including the recent parliamentary elections in South Korea the book considers the socio economic and political implications of the financial crisis It is invaluable reading for students of modern Korea *The 'Double Democratic Deficit'* Heiner Hänggi, 2017-11-28 Many current threats to security arising from terrorism rogue states and civil wars are highly complex and often transnational in nature and effect Such threats can no longer be meaningfully addressed at the national level alone but require an international response Since the end of the Cold War the use of force under international auspices UN NATO EU has increased substantially However such actions have not necessarily been accompanied by improvements in their democratic accountability Pre existing problems and inadequacies of parliamentary oversight of armed forces and use of force at the national level of many democratic states are mirrored and even magnified at the international level The effect of imperfect democratic controls at

the national level and the challenges to provide transparent and accountable multilateral responses results in the so called double democratic deficit of the international use of force Each chapter in this innovative work analyses the challenges of parliamentary and democratic supervision of international security structures and puts forward proposals on how to improve democratic accountability of multinational responses to complex security challenges

The Stryker Brigade Combat Team Alan J. Vick, David T. Orletsky, Bruce R. Pirnie, Seth G. Jones, 2002-12-24 Examines alternative means to decrease the deployment time for the new Army medium weight brigade comparing air and sealift from the United States with air and fast but short range sealift from forward bases or preposition sites Historical experience and an assessment of U S regional interests are used to determine how much warning time the United States typically has before major force deployments and where it is most likely to deploy such forces

America and the World, 1898-2025 NA NA, 2016-04-30 This book surveys US achievements and failures in the world across the 20th century The analysis builds upon surveys of experts at the Woodrow Wilson International Center for Scholars and several universities conducted over the last 25 years The reasons for success and failure are subject to hot dispute Walter Clemens argues that the individual traits of US leaders account for far more variation in outcomes than the domestic or international contexts He concludes that the policy outcomes of the past century confirm the assumptions of mutual gain theory complexity theory and liberal peace theory Clemens then uses his analysis to sketch alternative futures that could face planners in the early 21st century

From Words to Deeds Willem Frederik Eekelen, 2006 In this new book Willem van Eekelen a diplomat turned politician charts the progression of the European security and defence policy its difficult and even competitive relationship with NATO and the development of a European security strategy

Strategy Tom Kane, 2013-12-24 Over twenty two centuries ago the Greek general Pyrrhus questioned the real gains of military victory Today we might reflect on the recent wars in Iraq and Afghanistan in much the same way War is not only cruel but capricious its outcomes are often bitter and frustrating even for the winning side

Strategy Key Thinkers expertly introduces the ideas of major strategic thinkers whose work explores the complex challenges associated with the use of military force Early chapters deal with the foundational work of Sun Tzu Sunzi Thucydides Vegetius Machiavelli and Carl von Clausewitz and their relevance to problems facing Western militaries today The book then considers broader issues such as the distinctive importance of air and maritime operations the difficulty of waging offensive land warfare in the face of modern firepower the implications of nuclear weapons and the potential of irregular warfare It concludes by highlighting key themes which connect and distinguish the works under consideration noting how these similarities and differences can inform the strategic debates of the early twenty first century

Limits of Law, Prerogatives of Power M. Glennon, 2001-07-31 NATO s bombing of Yugoslavia was justified NATO violated the United Nations Charter but nations have used armed force so often that the ban on non defensive use of force has been cast into doubt Dangerous cracks in the international legal order have surfaced widened ironically by the UN Security Council itself

which has ridden roughshod over the Charter's ban on intervention Yet nations remain hopelessly divided on what the rules should be An unplanned geopolitical order has thus emerged posing serious dilemmas for American policy makers in a world where intervention will be judged more by wisdom than by law

Review of NASA's Solid-Earth Science Strategy

National Research Council, Division on Earth and Life Studies, Board on Earth Sciences and Resources, Committee to Review NASA's Solid-Earth Science Strategy, 2004-10-13 The report reviews NASA's solid earth science strategy placing particular emphasis on observational strategies for measuring surface deformation high resolution topography surface properties and the variability of the earth's magnetic and gravity fields The report found that NASA is uniquely positioned to implement these observational strategies and that a number of agency programs would benefit from the resulting data In particular the report strongly endorses the near term launch of a satellite dedicated to L band InSAR measurements of the land surface which is a key component of the U S Geological Survey's hazards mitigation program and the multi agency EarthScope program

Asymmetries of Conflict John Leech, 2014-04-04 Decisions about defence and security are becoming increasingly open to public influence This book therefore aims to give both the voter and the decision maker a new vision of how to manage crises and avert hostilities with non traditional means

Northern Spotted Owl Management Plan in the National Forests (CA, OR, WA), 1992

Regional Security in the Asia Pacific Marika Vicziany, David P.

Wright-Neville, Peter Lentini, 2004-03-25 The September 2001 terrorist attacks shocked the world But what did they change In this book Asia specialists from academe and policy think tanks assess the impact of 9 11 on the Asia Pacific Drawing on unique fieldwork access to a wide range of documents and inside expertise the authors consider how old geo strategic and cultural fault lines have been overlaid with new security threats from state and non state actors With chapters on specific countries and regions defense policies terrorism and current and potential conflict zones this collection critically examines the Asia Pacific region's post 9 11 as well as post Iraq war security architecture

Constructing Regional Security W.

Durch, 2016-04-30 In this book William Durch examines conventional weapons proliferation since World War II the role of arms transfers in fueling regional conflict and prospects for curbing the global arms trade Noting that supply side arms control efforts which seek to constrain the companies and countries that produce and distribute major conventional weapons have a poor international track record Durch argues for a broader approach that tries to get at the demand side of the equation Addressing the political and regional dynamics that impel arms acquisitions he looks at how arms control might be combined with confidence and security building measures to contain demand and how value based arms trade control measures like codes of conduct could be implemented in stepwise fashion consistent with US national interests in regional stability

Strategic Digest, 2000

American Grand Strategy After 9/11: An Assessment Stephen D. Biddle, 2005

Grand strategy integrates military political and economic means to pursue states ultimate objectives in the international system American grand strategy had been in a state of flux prior to 2001 as containment of the Soviet Union gave way to a

wider range of apparently lesser challenges The 9 11 attacks on the Pentagon and the World Trade towers however transformed the grand strategy debate and led to a sweeping reevaluation of American security policy It may still be too early to expect this reevaluation to have produced a complete or nal response to 9 11 policies as complex as national grand strategy do not change overnight But after 3 years of sustained debate and adaptation it is reasonable to ask what this process has produced so far and how well the results to date serve American interests Rethinking the National Security of Pakistan Ahmad Faruqui, 2019-06-14 This title was first published in 2002 Policy makers in South Asia the Middle East and the Asian Pacific decision makers in the OECD countries organizations and specialists in academe will all find this publication indispensable It presents an integrated model of national security that emphasizes military and non military determinants In the light of this model it analyzes Pakistan s defence policies over the last half century and proposes a radical reform of Pakistan s military organization In addition to offering a comprehensive look at national security this book provides coherent interrelated analysis of the key issues such as political leadership social and economic development and foreign policy
