Educational Innovation in Economics and Business VI Tor A. Johannessen,Ansgar Pedersen,Kurt Petersen,2013-04-17 Business education and business research has often been criticized by the business community which claims that much of it is mainly directed at the establishment of teachers and researchers themselves instead of distributing their knowledge to the business community It may seem that many universities and other research institutions have turned into mere knowledge manufacturers where the emphasis is more on the output volume than on quality of relevance with little or no consideration for the end users As universities and corporations attempt to prepare management to be alert to future changes improved and even brand new teaching methodologies are required The main focus of the present volume is on the distribution and selection of new knowledge How can business educators deliver new knowledge to students and the business community more rapidly than before How should we define the core business curriculum when new knowledge becomes old knowledge

Entrepreneurship , Complex Society: In the Middle of a Middle World Bojan Radej,Mojca Golobič,2021-04-06 The decreasing capacity to govern complex social processes results in negative trends that breach system thresholds in all main social domains with extreme economic stratification of society Independent studies steadily report that a strong majority of the world s population between 60% and 80% already feels excluded and no longer represented by their governments The two prevailing concepts of complexity seem to overlook the central importance of mesoscopic complexity Socially complex conditions call for a new kind of social thought specifically developed for a blinded generation that must be as different from

modern and postmodern thoughts as they were different from their middle age precedents *Complex Society In the Middle of a Middle World* addresses the concerns of the excluded majority by explaining how present complex social conditions work in favor of generational aspirations to achieve a more positive future In the geometry of thinking a complex matter is not comprehensible objectively but only by evaluating overlaps between complexity domains on their periphery which is in the area of their inconsistencies The book first develops an evaluative methodology for studying complex social matters and then tests it with three case studies that reflect some of the most pressing problems in contemporary societies aggregation problem integration problem and organization problem The obtained findings give grounds for the depiction of an outline for the anti postmodern ordering of contemporary societies This ground breaking text will be of particular interest for graduate and post graduate level of social sciences evaluators of project program and policy impact evaluation evaluators of philosophy of science as well as methodologists of social research and public governance

Enterprising Initiatives in the Experience Economy Britta Timm Knudsen, Dorthe Refslund Christensen, Per Blenker, 2014-09-19 Over the last decade the close relationship between culture and economy or the experience economy has risen on the agenda Although there is an established research field for analysing the economic impact of entrepreneurship there is currently a limited amount of research that analyses the cultural impact and opportunity of entrepreneurship Linking experience economy with enterprising behavior moves the term away from businesses competitiveness and consumer behavior towards a more value focused business in general This ground breaking book integrates entrepreneurship and empowerment into one central theme drawing on research from both the social sciences innovation entrepreneurship empowerment and activism and the humanities participatory culture user generated designs creative networks Enterprising Initiatives expands the definition of entrepreneurship beyond a primarily economic profit seeking phenomenon to a broader understanding of enterprising behaviour based on an individual opportunity nexus Beyond social entrepreneurship it explores a broad range of individual collective and cooperative citizen initiatives under the umbrella of enterprising action This innovative approach will be of great interest to scholars in entrepreneurship social entrepreneurship cultural entrepreneurship cultural studies and consumer culture as well as for policy makers in public and local government regional development and cultural event management

Project Management Multiplicity - Current Trends Jan Pries-Heje, 2012 *The Enactment of Strategic Leadership* Darko Tipurić, 2022-08-05 This Open Access book explores the meaning and roles that strategy and leadership play in our lives Based on decades of experience the author contemplates whether we believe strategic leadership exists because it actually exists or whether it exists because we believe it does Both answers are true The author argues that the duality of the essence of strategic leadership is clear It may appear to be personalised or it may seem to be an important characteristic of the organization enacted everywhere where there is guidance In fact the discussion about strategic leadership raises more questions In this thought provoking book the author puts forward a robust critical assessment of one

of the most widely used concepts in management research and practice Beginning with an ontological and historical discussion around which the concept of strategic leadership has developed the book continues to discuss the phenomenon of strategic leadership Utilising a post modern perspective and by heavily drawing on concepts such as hegemony and ideology the author then discusses the role of organizational culture and networks as well as the underlying tensions that come associated with strategic leadership
