*The Active Learning Classroom: Strategies for Practical Educators* Jason Creekmore, Shannon Deaton, 2015-09-22 The goal of the book is simple To improve student achievement by helping teachers implement active learning strategies in the classroom To begin consider the following two questions in relation to your own classroom 1 Are your students actively engaged throughout the entirety of your daily lessons 2 Are students meeting your highest expectations regarding achievement If you answered no to either or both of these questions you are not alone Classroom teachers at all levels are challenged with low student engagement resulting in low student achievement Numerous studies indicate a positive correlation between engagement and achievement For this reason the teacher is the most important component of the learning process as he she is ultimately responsible for creating an atmosphere conducive to student achievement Active Learning has proven to be one of the most important tools for

engaging students promoting skills in motivation higher order thinking communication creative thinking and problem solving Most teachers agree that these skills are essential for increasing student achievement however these skills are difficult to foster in the traditional sage on a stage model Educators must learn to adopt a new guide on the side teaching paradigm whereby traditional instruction is supplemented by active learning strategies **Inspiring Active Learning** Merrill Harmin,Melanie Toth,2006-07-15 How can we structure class time efficiently How can we explain and lecture effectively How can we help students master content How can we make learning more real and lasting In this revised and greatly expanded 2nd edition of Inspiring Active Learning educators Merrill Harmin and Melanie Toth provide answers to our fundamental teaching questions and show us how to transform our classrooms into communities of active responsible learners The authors present an array of research based teacher tested strategies for managing our everyday responsibilities from beginning a class to grading homework from instructing large groups to promoting diligent seatwork from motivating slackers to handling disrupters These strategies focus on mutual respect not bossiness collaboration not isolation commitment to learning not fear of failure and the dignity of all not praise or rewards for a few Regardless of our level of experience or the grade or subject we teach the active learning approach helps us Perform routine teaching tasks more easily Discover a higher level of teaching success and personal satisfaction Establish a class climate of full participation and cooperation Prepare engaging lessons that keep students productively involved Encourage students to work energetically willingly and intelligently each day Inspire all students even the most challenging to strive for excellence With its detailed classroom examples and more than 250 practical strategies Inspiring Active Learning is a comprehensive reference for solving almost any teaching problem Note This product listing is for the Adobe Acrobat PDF version of the book **Teaching Actively** Melvin L. Moore,2004 Active Teaching and Active Learning Strategies Creating a Blueprint for Success is the cumulative result of a year of reflecting asking and listening to questions and comments that many have concerning the education of our youth The book s genesis however started many years ago as the state of California along with many other states embraced a standards based accountability system This accountability has now been coupled with the recent addition of The No Child Left Behind Legislation In a real sense we are entering both the best and worst of times I say this because of the effects of high stakes testing and the requirement that all students reach high levels of proficiency which admittedly are very lofty goals For this to be realized changes will be required in teaching and

assessment as well as a more concentrated focus on student learning The instructional design introduced in this book advocates four components academic social collaborative contextual and cognitive developmental These components work in tandem with Active Teaching and Learning Strategies Combined they form a student responsive instructional methodology which optimizes student success and academic achievement We wanted to create a book that demonstrated to those of us in the field of education the value of looking at academic standards with data about our students and reflecting on how this information should influence our choices concerning instructional practices and our perceptions about the students that we are entrusted with The focus of this endeavor is to see all students achieve and succeed and to keep passion and compassion at the heart of all that we do It is the premise of this book that the difference between effective and outstanding teachers are that outstanding teachers care know how to utilize data practice active teaching strategies and promote the active learning of students Together these characteristics became the design and course of action that Created a Blueprint for Success
