

The painting is a still life, depicting a scene of everyday objects. The central focus is a large, red velvet cushion, which is placed on a dark, reflective surface. To the right of the cushion, a small, ornate vase holds a bouquet of flowers. In the foreground, a shallow, light-colored bowl is filled with various fruits, including apples and pears. The background is dark and indistinct, with some light-colored objects visible on a shelf or table. The overall style is characteristic of 17th-century Dutch still life painting.

Taylor, Les Sternberg, 2012-12-06

Exceptional Children Integrating Research and Teaching provides a comprehensive introduction to the constantly changing area of special education The book is research based and its title reflects our opinion regarding the important link between research and classroom practice There is one feature of Exceptional Children Integrating Research and Teaching that warrants attention and perhaps justification it was written specifically to address the graduate student or sophisticated undergraduate student market As such the book is written at a higher level and with a greater concept density than typical introductory special education texts We feel that this type of book is very much needed and will be received favorably by the special education community There are also several unique features of Exceptional Children Integrating Research and Teaching that we feel will be quite valuable First we have emphasized the area of teaching practices and not simply included basic facts about definitions characteristics and causes Although some introductory texts include information about teaching considerations that area is not discussed as in depth as it is in our text We feel that it is important that readers not only understand the educational needs of exceptional children but also can identify the best educational practices to meet those needs **Infant-toddler Intervention**, 1991 Resources in Education, 2000 **Parents and Young Mentally**

Handicapped Children Helen McConachie, 2016-01-08 First published in 1986 this book reviews research on the role parents play in fostering the early development of children with mental handicaps Professionals and parents must work together to give such children the chance of living as ordinary lives as possible and here the author develops a broadly based conceptual framework for the involvement of parents as teachers of their young handicapped children McConachie identifies

characteristics of parents which seem of particular relevance to the design and success of intervention programmes Although written in the 1980s this book discusses topics that are still important today
