Strategies of Display Julia Noordegraaf, 2004 History of museum presentation within the context of the nineteenth and twentieth century visual culture Taking the remarkable display history at the Boijmans Van Beuningen Museum in Rotterdam as a point of departure it reflects on the history of presentation in museums in Western Europe and North America Museums communicated with their audiences through their presentations Boekbespreking in Boekman 16 2004 61 herfst 167 169

Uncertain Images: Museums and the Work of Photographs Elizabeth Edwards, Sigrid Lien, 2016-02-17 Almost all museums hold photographs in their collections and museum professionals and their audiences engage with photographs in a myriad of ways Yet despite some three decades of critical museology and photographic theory and an extensive debate on the politics of representation outside art museums almost no critical attention has been given specifically to the roles purposes and lives of these photographs within museums This book brings into focus the ubiquitous yet entirely unconsidered work that photographs are put to in museums The authors argument is that there is an economy of photographs in museums which is integral to the processes of the museum and integral to the understanding of museums The international contributors drawn from curators and academics reflect a range of visual and museological expertise After an introduction setting out the range of questions and problems the first part addresses broad curatorial strategies and ways of thinking about photographs in museums Shifting the emphasis from curatorial practices and anxieties to the space of the gallery this is followed by a series of case studies of exhibitionary practices and the museum strategies that support them The third section focuses on the role of photographs in the museum articulation of difficult histories A final section addresses photograph collections in a digital environment New technologies and new media have transformed the management address and purposing in photographs in museums from cataloguing practices to streaming on social media These growing practices challenge both traditional hierarchies of knowledge in museums and the location of authority about photographs The volume emerges from PhotoCLEC a HERA funded project on museums and the photographic legacy of the colonial past in a postcolonial and multicultural Europe

Orr, 2019-11-28 The book builds an original argument for the department store as a significant site of design production and therefore offers an alternative interpretation to the mainstream focus on consumption within retail history Emily M Orr presents a fresh perspective on the rise of modern urban consumer culture of which the department store was a key feature By investigating the production processes of display as well as fascinating information about display making s tools and technologies the skills of the displayman and the meaning and context of design decisions which shaped the final visual effect are revealed In addition the book identifies and isolates display as a distinct moment in the life of the commodity and understands it as an influential channel of mediation in the shopping experience The assembly and interpretation of a diverse range of previously unexplored primary resources and archives yields fascinating new evidence showing how display achieved an agency which transformed everyday objects into commodities and made consumers out of passersby
