**Competitive Strategy** John A. Pearce, Richard Braden Robinson, 1991 *Handbook of Global Supply Chain Management* John T. Mentzer, Matthew B. Myers, Theodore P. Stank, 2007 Today all companies either source globally sell globally or compete with some company that does This handbook provides a comprehensive understanding and assessment of the field of global logistics and supply chain management **Downscoping** Robert E. Hoskisson, Michael A. Hitt, 1994-09-01 Large

diversified firms face unique challenges as they compete worldwide and corporate restructuring is one way multinationals strive for competitive advantage Weighing the pros and cons of a variety of approaches to restructuring Downscoping offers executives a clear strategic path through the maze The authors show that when a multinational conglomerate fails to compete effectively too much diversification may be the culprit Whether the result of weak corporate governance or poor corporate strategy over diversification can make managers unfamiliar with some of the markets in which they compete opt for safety over innovation This risk aversion and lack of long range commitment to innovation lead inevitably to stagnation over the longer term The answer is not downsizing closing offices and laying off personnel but downscoping a strategic approach to restructuring The options include incentive and compensation adjustments for executives leveraged buy outs and capital structure changes focusing on core skills diversifying internationally while focusing on businesses in which a firm has

strong competencies and buying and selling mature businesses where product development is not a great concern. Regardless of the approach executives must exercise strategic leadership during and after restructuring including providing strategic direction exploiting core competencies developing human capital and sustaining the corporate culture. Based on systematic research rather than casual observation Downsizing provides a strong description of restructuring alternatives and their resulting tradeoffs. Its specific guidelines for maintaining competitiveness will be essential reading for managers involved in corporate restructuring.

Raynor, 2007-02-20 A compelling vision Bold leadership Decisive action Unfortunately these prerequisites of success are almost always the ingredients of failure too In fact most managers seeking to maximize their chances for glory are often unwittingly setting themselves up for ruin The sad truth is that most companies have left their futures almost entirely to chance and don't even realize it The reason Managers feel they must make choices with far reaching consequences today but must base those choices on assumptions about a future they cannot predict It is this collision between commitment and uncertainty that creates THE STRATEGY PARADOX This paradox sets up a ubiquitous but little understood tradeoff Because managers feel they must base their strategies on assumptions about an unknown future the more ambitious of them hope their guesses will be right or that they can somehow adapt to the turbulence that will arise In fact only a small number of lucky daredevils prosper while many more unfortunate but no less capable managers find themselves at the helms of sinking ships Realizing this even if only intuitively most managers shy away from the bold commitments that success seems to demand choosing instead timid unremarkable strategies sacrificing any chance at greatness for a better chance at mere survival Michael E Raynor coauthor of the bestselling *The Innovator's Solution* explains how leaders can break this tradeoff and achieve results historically reserved for the fortunate few even as they reduce the risks they must accept in the pursuit of success In the cutthroat world of competitive strategy this is as close as

you can come to getting something for nothing Drawing on leading edge scholarship and extensive original research Raynor s revolutionary principle of Requisite Uncertainty yields a clutch of critical counter intuitive findings Among them The Board should not evaluate the CEO based on the company s performance but instead on the firm s strategic risk profile The CEO should not drive results but manage uncertainty Business unit leaders should not focus on execution but on making strategic choices Line managers should not worry about strategic risk but devote themselves to delivering on commitments With detailed case studies of success and failure at Sony Microsoft Vivendi Universal Johnson Johnson AT T and other major companies in industries from financial services to energy Raynor presents a concrete framework for strategic action that allows companies to seize today s opportunities while simultaneously preparing for tomorrow s promise **CA INTER**
