The Strategy of Truth Leonard Nathanson, 1967 *Thomas Browne and the Writing of Early Modern Science* Claire Preston, 2005-02-17 Claire Preston argues that Thomas Browne's work can be fully understood only within the range of disciplines and practices associated with natural philosophy and early modern empiricism Early modern methods of cataloguing collecting experimentation and observation organised his writing on many subjects from medicine and botany to archaeology and antiquarianism Browne framed philosophical concerns in the terms of civil behaviour with collaborative networks of intellectual exchange investigative selflessness courtesy modesty and ultimately the generosity of the natural world itself all characterising the return to innocent knowledge which for Browne is the proper end of human enquiry In this major evaluation of Browne's oeuvre Preston examines how the developing essay form the discourse of scientific experiment and above all Bacon's model of intellectual progress and cooperation determined the unique character of Browne's contributions to early modern literature science and philosophy

Nardo, 1991-01-01 This book argues that play offered Hamlet John Donne George Herbert Andrew Marvell Robert Burton and Sir Thomas Browne a way to live within the contradictions and conflicts of late Renaissance life by providing a new stance for the self Grounding its argument in recent theories of play and in a historical analysis that sees the seventeenth century as a point of crisis in the formation of the western self the author demonstrates how play helped mediate this crisis and how central texts of the period enact this mediation

Schoneveld, 2023-11-20 These ten studies provide a view of the extent to which intellectual and literary life in Holland has been influenced by English ideas The book concludes with an overview of Anglo Dutch cultural transfer from the early seventeenth century to the late nineteenth century concentrating on what between Sir Thomas Browne's stay in Leiden in 1633 and L A J Burgersdijk's complete translation of Shakespeare in the 1880s was transmitted what sea changes occurred during the voyage and in how far these resulted in something rich and strange The emphasis in some of the essays is on intellectual or scholarly contacts with Holland mostly on the receiving end but by no means exclusively so In the field of literature proper given the continuing prestige of French letters there lies a special interest in watching the gradually increasing appreciation of English non fiction fiction poetry and drama This was brought about by translations and by the growing familiarity of Dutch cultural leaders with the English language itself in spite of long standing aversions to its composition and sound continuing far into the nineteenth century The analysis of translation strategies and adaptations often made to suit the target culture also contributes to the history of translation a branch of Translation Studies now coming into its own Milton and the Natural World Karen L. Edwards, 2005-07-07 Milton and the Natural World overturns prevailing critical assumptions by offering a fresh view of *Paradise Lost* in which the representation of Eden's plants and animals is shown to be fully cognizant of the century's new scientific natural history The fabulous lore of the old science is wittily debunked and the poem embraces new imaginative and symbolic possibilities for depicting the natural world suggested by the speculations of Milton's scientific contemporaries including Robert Boyle Thomas Browne and John Evelyn Karen Edwards argues that Milton has represented the natural world in *Paradise Lost* with its flowers and trees insects and beasts as a text alive with meaning and worthy of close reading **Encyclopedia of Renaissance Philosophy** Marco Sgarbi, 2022-10-27 Gives accurate and reliable summaries of the current state of research It includes entries on philosophers problems terms historical periods subjects and the cultural context of Renaissance Philosophy Furthermore it covers Latin Arabic Jewish Byzantine and vernacular philosophy and includes entries on the cross fertilization of these philosophical traditions A unique feature of this encyclopedia is that it does not aim to define what Renaissance philosophy is rather simply to cover the philosophy of the period between 1300 and 1650 Bibliography on the History of Chemistry and Chemical Technology. 17th to the 19th Century Valentin Wehefritz, 2011-06-24 No detailed description available for Bibliography on the History of Chemistry and Chemical Technology 17th to the 19th Century *Biblical Scholarship, Science and Politics in Early Modern England* Kevin Killeen, 2016-12-05 Kevin Killeen addresses one of the most enigmatic of seventeenth century writers Thomas Browne 1605-1682 whose voracious intellectual pursuits provide an unparalleled insight into how early modern scholarly culture understood the relations between its disciplines Browne's work encompasses biblical commentary historiography natural history classical philology artistic propriety and an encyclopaedic coverage of natural philosophy This

book traces the intellectual climate in which such disparate interests could cohere locating Browne within the cultural and political matrices of his time While Browne is most frequently remembered for the magnificence of his prose and his temperamental poise qualities that knit well with the picture of a detached apolitical figure this work argues that Browne s significance emerges most fully in the context of contemporary battles over interpretative authority within the intricately linked fields of biblical exegesis scientific thought and politics Killeen s work centres on a reassessment of the scope and importance of Browne s most elaborate text *Pseudodoxia Epidemica* his vast encyclopaedia of error with its mazy series of investigations and through this explores the multivalent nature of early modern enquiry
