of their own independent personal development **Foreign Policy Formulation and Implementation of Small States**

Faies Jafar, 2023-05-08 The foreign policy behavior of small states which in today's world comprise some sixty countries is not prominently represented in academia. Studies associated with these states' foreign policy tend to focus on their behavior in the international arena with a clear dominance of realist thoughts. Small states are often seen from a closed box approach where the internal factors leadership and other domestic issues are given scant attention by scholars leaving substantial and important gaps in the knowledge. This book which emerged from original and extensive research over five years attempts to fill some of these gaps. The book is concerned with the foreign policy formulation and implementation of the small Caribbean state of Trinidad and Tobago and without the claim of generalization it is hoped that similar studies will encourage scholars to develop a wider theory about small states' foreign policy behavior. The foreign policy process and the associated factors provide insights and help to develop an epistemic framework as to how the twin island state behaved under objective and subjective constraints and more specifically how the decision makers choose their foreign policy preferences. Strategies

for National Sustainable Development Jeremy Carew-Reid, Robert Prescott-Allen, Stephen Bass, Barry

Dalal-Clayton, 2013-11-05 The IUCN Strategies for Sustainable Development Handbook Series. This handbook is one in a series being produced by IUCN and its partners to assist countries and communities implement Agenda 21, the action programme of the United Nations Conference on Environment and Development. The series will include handbooks on national strategies for sustainable development, local strategies, assessing progress towards sustainability, biodiversity action plans involving indigenous peoples and on integrating population and resource use planning and regular companion volumes of case studies addressing the key issues of concern to strategy implementation. Many international agreements and action plans now call for countries to undertake national strategies. These strategies seek to involve communities in united approaches to sustainable development. Some are sectoral such as tropical forest strategies; others are thematic covering topics such as biodiversity, education or climate change. Still others such as national conservation strategies and national environment action plans are evolving to become more comprehensive processes drawing together economic, social and environmental development actions. This handbook is for people involved in strategies. It draws on experiences in different regions of the world to present options and examples of the role of strategies in sustainable development. Introducing Foreign Models for Development Izumi Ohno,Kimiaki Jin,Kuniaki Amatsu,Junichi Mori,2023-10-03 This open access book studies how foreign models of economic development can be effectively learned by and applied to today s latecomer countries Policy capacity and societal learning are increasingly stressed as pre conditions for successful catch up However how such learning should be initiated by individual societies with different features needs to be explained The book

answers this pragmatic question from the perspective of Japan's past experience and its extensive development cooperation in Asia, Africa and Latin America. Since the late nineteenth century, Japan has developed a unique philosophy and method for adopting advanced technologies and systems from the West; the same philosophy and method govern its current cooperation with the developing world. The key concepts are local learning and translative adaptation. Local learning says that development requires the learner to adopt a proactive mindset and the goal of graduating from receiving aid. Meanwhile, translative adaptation requires foreign models be modified to fit local realities given the different structures of the home and foreign society. The development process must be wholly owned by the domestic society in rejection of copy and paste acceptance. These ideas not only informed Japan but are key to successful development for all. The book also asks how this learning method should or should not be revised in the age of SDGs and digitalization. Following the overview section that lays out the general principles, the book offers many real cases from Japan and other countries. The concrete actions outlined in these cases with close attention to individual growth ingredients as opposed to general theories are crucial to successful policy making. The book contains materials that are highly useful for national leaders and practitioners within developing countries as well as students of development studies.

Governance and Sustainable Development in South Asia Habib Zafarullah, Fara Azmat, 2024-11-01. This edited volume analyzes South Asian public administration and its role in development through the lens of SDG 16. Each case presented offers best practices, the challenges faced and the opportunities SDG 16 provides for regional and national development as well as valuable insights into the transfer of knowledge and learning within the South Asian region and for broader South-South and South-North exchange. The book is intended for policymakers, businesses, civil society organizations as well as academics across research fields spanning management, social innovation and corporate sustainability who are pursuing research on public administration, governance and the SDG Agenda.

Comparative Regionalisms for Development in the 21st Century Timothy M. Shaw, 2016-05-23. The global financial crisis at the turn of the decade has accelerated changes in the relative standing of major regions. As both the US and Eurozone economies have confronted a series of setbacks and struggles to find their second breath, so Asia, Latin America and even Africa have picked up the slack and have been able to maintain high levels of growth. The resilience of the Global South questions whether we are witnessing an evolution towards a regional rebalancing or even global restructuring. This responding volume has four interrelated topics. It explores the transformation taking place in with regard to the financing of development in the Global South and the apparition of new players in the field. The emergence of New Regionalisms in the South and the usefulness of these experiences for comparative studies of regional relationship is explicated. It turns its attention to new forms of transnational governance that are emerging and the role that a

novelty of actors play in this new multilateralism Finally it looks into the implications of this trio of novel directions and players for analyses and policies
