expression of a system of temporal relations in a stretch of discourse in which all the situations are located within the same temporal area On the other hand there are many contexts in which speakers might in theory choose between two or more tenses to locate a situation e g when we choose between the past tense and the present perfect to locate a situation before speech time and the book examines the difference that a choice of one or the other tense may make within a discourse context The book moves from a detailed exploration of the meaning and use of individual tenses to a thorough analysis of the way in which tenses can be seen to function together as sets and finally to a detailed examination of tenses in and tenses interacting with temporal adverbials Original data is used frequently throughout the book to illustrate the theory discussed
