implemented might be systematically reproducing many of the urban spatial and social inequalities and injustices that have characterized cities for the last century or more. From critiques of a mobility bias rooted in the neoliberal foundations of the Complete Streets concept to concerns about resulting environmental gentrification, the chapters in *Incomplete Streets* variously call for planning processes that give voice to the historically marginalized and more broadly that approach streets as dynamic, fluid, and public social places. This interdisciplinary book is aimed at students, researchers, and professionals in the fields of urban geography, environmental studies, urban planning, and policy, transportation planning, and urban sociology.
