The Moral Motive Of Man:

The Moral Skeptic Anita M. Superson, 2009-03-13 Anita Superson challenges the traditional picture of the skeptic who asks Why be moral While holding that the skeptic's position is important she builds an argument against it by understanding it more deeply and then shows what it would take to successfully defeat it Superson argues that we must defeat not only the action skeptic but the disposition skeptic who denies that being morally disposed is rationally required and the motive skeptic who believes that merely going through the motions in acting morally is rationally permissible We also have to address the amoralist who is not moved by moral reasons he recognizes Superson argues for expanding the skeptic's position from self interest to privilege to include morally unjustified behavior targeting disenfranchised social groups as well as revising the traditional expected utility model to exclude desires deformed by patriarchy as irrational Lastly she argues that the challenge can be answered if it can be shown that it is in an important way inconsistent and therefore irrational to privilege oneself over others The Moral Skeptic makes an important contribution to both metaethics moral theory and feminist philosophy and brings feminist thinking into the larger discussion of the skeptical challenge

Divine Selection or The Survival of the Useful George Henry Dole, 2020-12-08 In Divine Selection or The Survival of the Useful George Henry Dole explores the intricate interplay between evolution and natural theology positing that the processes of selection serve a divine purpose in the shaping of life Dole's literary style marries scientific inquiry with philosophical reflections crafting a narrative that is both erudite and engaging This work emerges from the broader intellectual milieu of the late 19th century when Darwinian theories of evolution were beginning to challenge established religious paradigms prompting a reevaluation of the relationship between science and spirituality George Henry Dole a prominent figure in American philosophy and a committed advocate of transcendentalism draws on a rich tapestry of religious thought and scientific understanding in his examination of nature's selective processes His background in both philosophy and theology informs his nuanced perspective allowing him to navigate the complexities of faith and reason with remarkable clarity Dole's unique stance on divine involvement in evolutionary mechanisms reflects his desire to reconcile seemingly divergent worldviews emphasizing the significance of purpose in a universe governed by chance This thought provoking text is a must read for anyone fascinated by the dialogue between science and religion Dole's ability to articulate a vision where faith and scientific understanding coexist invites readers to contemplate profound questions about existence purpose and the natural world As such it is not only a significant contribution to the fields of philosophy and theology but also an engaging inquiry for general readers interested in the intersection of these domains

Christian Ethics Two Volumes in One Revised Dr. Adolf Wuttke,

Man and Morals Celestine M. Bittle,2022-06-17 Everyone is aware of the distinction between right and wrong between what is morally good and morally bad The distinction is made by people every day in the home and in the school in business and labor in courts and police actions in politics and in government And yet the attitude of many persons toward human conduct is largely amoral People know intuitively that some actions are morally good and others morally bad but they are not sure why they are so It is therefore necessary to reaffirm the principles which underlie morality Ethics or moral philosophy seeks to lay bare the natural foundations of correct living to uncover the principles which govern morality and make individual actions to be right or wrong and thus develop the science of right conduct
