Conscious Evolution Barbara Smith Stoff,Sheldon Stoff,2010-10-27 With deep reading in myth and literature ones cognition becomes as a rich mother loam wherein spirit can dwell and build that interior castle from which the indwelling spirit begins to speak through the imagination the body and the intellect of the individual Over time body mind and spirit become one Then this one can and often does experience the merging within the One Through the merging of intuition and intellect we will comprehend the acceleration of consciousness that is overtaking us Functioning within a state of universal awareness of our oneness will in the long run prove to be much easier than defining ourselves into small groupings of discordant persons and nations The education and evolution of vibrant communities is our beginning task The creation of a world with a universal consciousness of oneness is our ultimate realization To act in accord to make a bridge to new ways of thinking and in the belief that the reported experiences of individual journeys in our studies and in our consciousness can be of great significance now at this point in time with the world in a general state of confrontation and conflict we offer this report from our own research and from within this frame of reflection **Julian Huxley, Evolutionism and the History of**

Transhumanism Ingrid Dunér,2025-03-18 The evolutionary biologist Julian Huxley 1887 1975 attempted to promote a religion for the future which he would come to refer to as Transhumanism Transhumanism was an attempt to unite a more traditional humanistic view of the human as containing some form of core essence or potential with an evolutionary point of view of humans as a work in progress Before humans natural selection had been responsible for the transformation of life Through its ordering principles and through chance it had given rise to humankind which had ushered in a new phase of evolution Humanity stood on the threshold of yet another critical point in evolution The consciously purposive phase of

evolution This open access book explores the history of transhumanism by analyzing how Julian Huxley's transhumanism develops and why it does at this particular point in time by placing it firmly within the context of his specific scientific and sociopolitical milieu starting roughly in the interwar years and stretching over the Second World War to the 1970s Continuing the study then focuses on the new transhumanists of the 1970s 1980s and 1990s and investigates continuity in mode of thinking contributing to a more coherent understanding of transhumanism its history and of modern projects of human enhancement The book captures how scientific and technological development in relation to society and social order shapes images and expectations of the future and of what future is desirable
