

The Mottled Duck

Jena A. Moon

The Mottled Duck:

The Mottled Duck Charles D. Stutzenbaker, 1988 This classic study published in 1988 by the Texas Parks and Wildlife Department is now available in its original edition from UT Press Duck expert Charles Stutzenbaker reports on his years of research along the Texas and Louisiana Gulf Coast examining limiting factors on population and breeding and offering management recommendations based on present and forecasted conditions

Mottled Duck (*Anas Fulvigula*) Ecology in the Texas Chenier Plain Region Jena A. Moon, 2014 Many studies and plans have outlined the importance of the Chenier Plain Region of the Western Gulf Coast WGC to resident mottled ducks *Anas fulvigula* including the Mottled Duck Conservation Plan and the Chenier Plain Initiative for the Gulf Coast Joint Venture The Chenier Plain Region historically and currently has the greatest density of mottled ducks in the WGC Population Loss and degradation of mottled duck coastal habitats is the leading cause for mottled duck decline in the Chenier Plain Region Stutzenbaker 1988 Urbanization erosion subsidence conversion to agriculture saltwater intrusion invasive plant and animal establishment loss of natural disturbance sea level rise and heavy metal accumulation all have played a role in the decline of quantity and quality habitats available to mottled ducks Stutzenbaker 1988 Wilson 2007 However the overriding limiting factor affecting the species recovery lies within altered hydrology of the Chenier Plain Region The mottled duck *Anas fulvigula* has been established as an indicator species to coastal marsh health and function Stutzenbaker 1988 USFWS 2011 Currently biologists have a relatively poor understanding of mottled duck habitat use regional movements response to habitat management and movements This information is needed to assist in strategic habitat conservation planning and to inform conservation for the species

Movements, Space Use, and Habitat Selection of the Mottled Duck in Georgia and South Carolina Kaylee Marie Pollander, 2017 A non native population of resident mottled ducks *Anas fulvigula* exists in coastal South Carolina and Georgia but little is known about their ecology and behavior I used GPS telemetry to document movements space use and habitat use of 47 individuals between 2013-2016 Mean seasonal home ranges varied from 2002 to 4598 ha Individuals made 23 excursions outside of established ranges varying from 5 km to 139.5 km 5 dispersal movements varying from 52.6 km to 245.8 km and 6 long distance movements Mottled ducks selected for managed impoundments at multiple spatial scales My findings indicate that mottled ducks in Georgia and South Carolina are likely one population and are highly dependent on impounded wetlands I recommend state and federal agencies create and manage impounded wetlands to benefit mottled ducks across the South Carolina and Georgia coasts

The North American Perching and Dabbling Ducks Paul Johnsgard, 2017-03 This volume the fourth in a series of books that collectively update and expand P A Johnsgard's 1975 The

Waterfowl of North America summarizes research findings on this economically and ecologically important group of waterfowl. The volume includes the mostly tropical perching duck tribe Cairinini of which two species, the muscovy duck and the wood duck, are representatives. Both species are adapted for foraging on the water surface mostly on plant materials but typically perch in trees and nest in elevated tree cavities or other elevated recesses. This volume also includes the dabbling or surface feeding duck tribe Anatini, a large assemblage of duck species that mainly forage on the water surface but nest on the ground or only very rarely in elevated locations. Of this tribe 12 species that regularly breed in North America are included among them such familiar species as mallards, wigeons, pintails, and teal. Descriptive accounts of the distributions, populations, ecologies, social, sexual behaviors, and breeding biology of all these species are provided together with distribution maps. Five additional Eurasian and West Indian species have been reported several times in North America; these have been included with more abbreviated accounts, but all 17 species are illustrated by drawings, photographs, or both. The text includes about 84,000 words and contains more than 1,000 references. There are also 12 distribution maps, 21 drawings, 28 photographic plates, and 58 anatomical or behavioral sketches.

Ducks, Geese, and Swans of North America Guy A. Baldassarre, 2014

Ducks, Geese, and Swans of North America has been hailed as a classic since the first edition was published in 1942. A must have for professional biologists, birders, waterfowl hunters, decoy collectors, and wildlife managers, this fully revised and updated edition provides definitive information on the continent's forty-six species. Maps of both winter and breeding ranges are presented with images by top waterfowl photographers and the acclaimed original artwork of Robert W. Bob Hines. Originally authored by F. H. Kortright and later revised by Frank Bellrose, this latest edition, which has been meticulously updated by renowned waterfowl biologist Guy Baldassarre, continues the legacy of esteemed authors. Each species account contains in-depth sections on identification, distribution, migration, behavior, habitat, population status, breeding biology, rearing of young, recruitment, and survival, food habits, and feeding ecology, molts, and plumages, conservation, and management. To facilitate identification, the species accounts also include detailed illustrations of wings. An appendix contains comparative illustrations of ducklings, goslings, and cygnets. Guy Baldassarre has hit the target. His remake of the Kortright-Bellrose classic provides good biological descriptions, wonderful photographs and illustrations, and easy-to-understand information about waterfowl. I would encourage every hunter and enthusiast to have these books as an educational guide to waterfowl and their needs.

H. Dale Hall, CEO, Ducks Unlimited Inc. When, as an eleven-year-old in 1942, I read F. H. Kortright's first edition of this book, it altered the trajectory of my life. Every subsequent edition, including this latest update by Guy Baldassarre, has improved the landmark reference. I can't imagine that anyone interested in waterfowl or wetlands can live without this indispensable book.

Paul A. Johnsgard, University of Nebraska-Lincoln. Creating a brand new version of such a timeless and previously revised classic is a risky venture, indeed, but nobody could be better suited for this monumental task than Guy Baldassarre. He has created a stunning new classic, at once magnificent in its visual appeal and truly comprehensive in its

scientific breadth and depth Hats off to Guy for dedicating himself to this project with such obvious passion patience and skill This book absolutely belongs on the shelf or coffee table of anyone who has ever marveled at waterfowl whether through their binoculars or from inside the duck blind John W Fitzpatrick Cornell Laboratory of Ornithology Guy Baldassarre was a professor of wildlife ecology at the State University of New York College of Environmental Science and Forestry in Syracuse until his death in 2012 He is the coauthor of the textbook Waterfowl Ecology and Management Johns Hopkins University Press Baltimore www.press.jhu.edu This product consists of two volumes packaged in a slipcase along with a CD containing references and additional maps ISBN 13 978 1 4214 0751 7 ISBN 10 1 4214 0751 5 Use barcode for ISBN 13 978 1 4214 0751 7 Cover design Cover illustration Northern Pintail GaryKramer net Author photo HOLD SPACE FOR AUTHOR PHOTO X marketing author photos John W Fitzpatrick Cornell Lab of Ornithology Midwest Book Review **Anas Fulvigula** ,1994
