Greenstein, 1988 In presidential election years the leadership qualities of occupants of the Oval Office become yardsticks for aspiring candidates What profile of qualities both positive and negative helps explain the performance of chief executives In this book about the White House nine eminent political scientists and historians present their assessments of the leadership styles and organizational talents of presidents from Franklin D Roosevelt to Ronald Reagan Filled with anecdote and insight this is an unprecedented opportunity to observe how the running of the office of President has been changed subtly and not so subtly by the management and personal styles of the various incumbents within their historical contexts The book vividly depicts each president There is Roosevelt a real artist in government Truman a strong executive who always managed to appear weak Eisenhower who cultivated the image of being above the fray of politics but was actually fully occupied with getting political results Kennedy who successfully projected the symbolic grandeur of his office Johnson a figure from classical tragedy Nixon who preferred a corporate to a political mode of operation Ford who placed healing the nation's wounds from Vietnam and Watergate above his personal political future Carter whose fall was as stunning as his rise was meteoric The chapter on Reagan is an impassioned encomium of the president as a folk philosopher that is bound to be controversial These accounts of leadership by modern presidents are acute studies of how the presidency has become the first among equals in our tripartite system of government This book will be important to political scientists historians and government officials and the liveliness of its presentation and the quotidian impact of the men it describes will make it attractive to everyone interested in how we are governed and who is doing the governing **FDR and the Modern Presidency** William D.
