The Morals Of Markets An Ethical Exploration:

The Morals of Markets Harry Burrows Acton,1971 **The Morals of the Market** Jessica Whyte,2019-11-05 Why did the rise of human rights in the 1970s coincide with the institutionalisation of neoliberalism And why has the neoliberal age also been the age of human rights Drawing on detailed archival research on the parallel histories of human rights and neoliberalism Jessica Whyte uncovers the place of human rights in neoliberal attempts to develop a moral framework for a market society In the wake of World War Two neoliberals saw demands for new rights to social welfare and self determination as threats to civilisation Yet rather than rejecting rights they developed a distinctive account of human rights as tools to depoliticise civil society protect private investments and shape liberal subjects Honing in on neoliberal political thought Whyte shows that the neoliberals developed a stark dichotomy between politics conceived as conflictual coercive and violent and civil society which they depicted as a realm of mutually beneficial voluntary market relations between individual subjects of rights In mobilising human rights to provide a moral language for a market society neoliberals contributed far more than is often realised to today s politics of human rights Corporate Ethics for Turbulent Markets Oswald A. J. Mascarenhas, SJ,2018-10-30 Corporate Ethics for Turbulent Markets The Market Context of Executive Decisions focuses on the HOW of doing business the economic social ethical moral and spiritual values we bring to our business ventures and how thereby we impact the world *The Morals of Markets and Related Essays* Harry Burrows Acton,1993 The Morals of Markets offers a philosophically and historically informed defense of a market based form of social organization Acton discusses the profit motive competition monopoly the supposed impersonality of the marketplace the assumed chaos of markets self interest egalitarianism central planning and distributive justice For all their high moral tone Acton concludes the criticisms leveled and the political platforms proffered against free markets are full of contradictions and unanalyzed assumptions A particular strength of Acton s book is that he is himself something of a moral traditionalist **A Primer on Critical Thinking and Business Ethics** Oswald A. J. Mascarenhas, SJ,Munish Thakur,Payal Kumar,2024-03-04 A Primer on Critical Thinking and Business Ethics Critical Thinking Applied to Business Management Volume 2 encapsulates new developments in Critical Thinking skills for MBA students in the form of a broad based cross disciplinary primer in business management with a special focus on business ethics Liberty, Desert and the Market Serena Olsaretti,2004-09-23 Are inequalities of income created by the free market just In this book Serena Olsaretti examines two main arguments that justify those inequalities the first claims that they are just because they are deserved and the second claims that they are just because they are what free individuals are entitled to Both these arguments purport to show in different ways that giving responsible individuals their due requires that free market inequalities in incomes be allowed Olsaretti argues however that neither argument is successful and shows that when we examine closely the principle of desert and the notions of liberty and choice invoked by defenders of the free market it appears that a conception of justice that would accommodate these notions

far from supporting free market inequalities calls for their elimination Her book will be of interest to a wide range of readers in political philosophy political theory and normative economics

Dictionary of Twentieth-Century British Philosophers

Stuart Brown,2005-06-01 This is a two volume work with entries on individuals who made some contribution to philosophy in the period 1900 to 1960 or soon after The entries deal with the whole philosophical work of an individual or in the case of philosophers still living their whole work to date Typically the individuals included have been born by 1935 and by now have made their main contributions Contributions to the subject typically take the form of books or journal articles but influential teachers and people otherwise important in the world of philosophy may also be included The dictionary includes amateurs as well as professional philosophers and where appropriate thinkers whose main discipline was outside philosophy There are special problems about the term British in the twentieth century partly because of human migration partly because of decolonialization and the changing denotation of the term The intention has been to include not only those who were British subjects at least for a significant part of their lives even if they mostly lived outside what is now the U K but also people who spent a significant part of their lives in Britain itself irrespective of their nationality or country of origin In the first category are included for instance a number of people who were born and educated in Britain but who subsequently taught in universities abroad In the second category are included those who were born elsewhere but who came to Britain and contributed to its philosophical culture

Philosophy and

Politics G. M. K. Hunt,1990-10-26 This 1990 collection explores one recurrent theme connecting philosophy and politics the relation between the nature of man and the structure of society It does so by concentrating on the topical issue of the market economy as an attempt to resolve the clash between individual autonomy and collective action Beginning with a historical and personal recollection by Enoch Powell and a response by Robert Skidelsky the volume then provides a forum for political theorists and philosophers to take issue on the fundamental topics of markets and morals liberal man and equality and libertarianism It succeeds equally as a stimulating textbook and a book for the general reader who wishes to understand the philosophical issues arising in a market economy

Explorations in Financial Ethics

Luc van Liedekerke,Jozef M. L. van Gerwen,Danny Cassimon,2000 The breakdown of Bretton Woods liberalised financial markets from extensive government

control Increasing deregulation and technological innovation created truly global financial markets the perfect companions for global business and shareholder philosophy But this swift evolution did not occur without specific risks or accidents Financial crises surged at the slightest provocation causing havoc around the globe They were the painful reminders that the increasingly virtual abstract and remote world of finance still exerts a serious impact on our everyday life Is it because of their abstract nature that there hardly exists any systematic ethical reflection on the functioning of financial markets The present volume makes an attempt to fill this gap The authors question the efficiency of the financial system the present state of financial regulation the role of central bankers and the functioning of exchange and derivative markets This collection of essays represents the outcome of a three year research project at the Center for Ethics of the University of Antwerp UFSIA which has been executed by a multi disciplinary team of philosophers and economists
