**The Motorization of American Cities** David J. St. Clair, 1986 Scimitar 1800 Ti 3 L GT GTE     The Motorization of American Cities David James St. Clair, 1986     **American Cities and Technology** Gerrylynn K. Roberts, Philip Steadman, 2005-11-01 Designed to be used on its own or as a companion volume to the American Cities and Technology textbook Chronologically this volume ranges from the earliest technological dimensions of Amerindian settlements to the wired city concept of the 1960s and internet communications of the 1990s Its focus extends beyond the US to include telecommunications in Asian cities in the late 20th century The topics covered the rise of the skyscraper the coming of the automobile age relations between private and public transport the development of infrastructural technologies and systems the implications of electronic communications the emergence of city planning     **The Public Works Department in American Cities** Clarence Eugene Ridley, 1929     **The American City** Arthur Hastings Grant, Harold Sinley Buttenheim, 1921     Changing Lanes Joseph F.C. Dimento, Cliff Ellis, 2014-08-29 The story of the evolution of the urban freeway the competing visions that informed it and the emerging alternatives for more sustainable urban transportation Urban freeways often cut through the heart of a city destroying neighborhoods displacing residents and reconfiguring street maps These massive infrastructure projects costing billions of dollars in transportation funds have been shaped for the last half century by the ideas of highway engineers urban planners landscape architects and architects with highway engineers playing the leading role In Changing Lanes Joseph DiMento and Cliff Ellis describe the evolution of the urban freeway in the United States from its rural parkway precursors through the construction of the interstate highway system to emerging alternatives for more sustainable urban transportation DiMento and Ellis describe controversies that arose over urban freeway construction focusing on three cases Syracuse which early on embraced freeways through its center Los Angeles which rejected some routes and then built I 105 the most expensive urban road of its time and Memphis which blocked the construction of I 40 through its core Finally they consider the emerging urban highway removal movement and other innovative efforts by cities to re envision urban transportation     *Extremes Of Mobility: Development And Consequences Of Transport Policy In Los Angeles* Stefan Bratzel, 2023-10-06 The development of transportation policy in Los Angeles is a history of extremes in the 1920s the city had the largest regional rail network in the world which was completely abolished 40 years later In its place a vast network of freeways was built in the metropolis with a car focused mobility pattern Los Angeles became a symbol of car oriented mobility with all the negative ecological and social side effects Since the 1990s Los Angeles has been rebuilding its public rail transport with little success so far This book examines the history of Los Angeles development and identifies the key drivers that have shaped the metropolis extreme transport policies With other cities facing similar albeit less extreme transportation issues they can learn from how Los Angeles had responded and continues to adapt to its considerable transport policy problems especially in order to avoid the mobility experiences faced by the

American city But to do so it is necessary to abandon the prevailing perspective which is largely limited to evaluating transport modes road versus rail A sustainable solution to the problems of metropolitan areas will only be possible if the origins of transport with their spatial social and economic interdependencies are understood and integrated into transport policy action

Burning Up Simon Pirani,2018-08-20 Coal gas and oil have been capitalism s main fuels since the industrial revolution And yet of all the fossil fuels ever consumed more than half were burned in the last 50 years Most alarming of all fossil fuel consumption has grown fastest in the last three decades since scientists confirmed that it is the main cause of potentially devastating global warming In Burning Up Simon Pirani recounts the history of fossil fuels relentless rise since the mid twentieth century Dispelling explanations foregrounding Western consumerism and arguments that population growth is the main problem Pirani shows how fossil fuels are consumed through technological social and economic systems and that these systems must change This is a major contribution to understanding the greatest crisis of our time

Liberty and Coercion Gary Gerstle,2017-10-24 How the conflict between federal and state power has shaped American history American governance is burdened by a paradox On the one hand Americans don t want big government meddling in their lives on the other hand they have repeatedly enlisted governmental help to impose their views regarding marriage abortion religion and schooling on their neighbors These contradictory stances on the role of public power have paralyzed policymaking and generated rancorous disputes about government s legitimate scope How did we reach this political impasse Historian Gary Gerstle looking at two hundred years of U S history argues that the roots of the current crisis lie in two contrasting theories of power that the Framers inscribed in the Constitution One theory shaped the federal government setting limits on its power in order to protect personal liberty Another theory molded the states authorizing them to go to extraordinary lengths even to the point of violating individual rights to advance the good and welfare of the commonwealth The Framers believed these theories could coexist comfortably but conflict between the two has largely defined American history Gerstle shows how national political leaders improvised brilliantly to stretch the power of the federal government beyond where it was meant to go but at the cost of giving private interests and state governments too much sway over public policy The states could be innovative too More impressive was their staying power Only in the 1960s did the federal government impelled by the Cold War and civil rights movement definitively assert its primacy But as the power of the central state expanded its constitutional authority did not keep pace Conservatives rebelled making the battle over government s proper dominion the defining issue of our time From the Revolution to the Tea Party and the Bill of Rights to the national security state Liberty and Coercion is a revelatory account of the making and unmaking of government in America

**Techno-Fixers** Sean F. Johnston,2020-03-26 This is the story of a seductive idea Over the past century the potential of new technology to solve social dilemmas has captivated modern culture From apps that encourage physical activity to airport scanners meant to prevent terrorism the concept that clever innovation can improve society is irresistible

but faith in such technological fixes is seldom questioned Where did this idea come from what makes it so appealing and how does it endanger our future Techno Fixers traces the source of modern confidence in technology to engineering hubris radical utopian movements science fiction fanzines policy makers soundbites corporate marketing and optimistic consumer culture from the turn of the twentieth century until today Sean Johnston demonstrates that through the promotion of prominent government scientists technocrats entrepreneurs and popular media modern invention became the favourite tool for addressing human problems and society's ills Nonetheless when it comes to assessing the success of cigarette filters as the solution to safe smoking or DDT as the answer for agricultural productivity the evidence is sobering Cautioning that the rhetoric of technological fixes seldom matches reality Johnston examines how employing innovation to bypass traditional methods can foster as many problems as it solves A critical examination of modern faith in technology Techno Fixers evaluates past mistakes present implications and future opportunities for innovating societies

The Motorization Of American Cities: Bestsellers in 2023 The year 2023 has witnessed a noteworthy surge in literary brilliance, with numerous compelling novels captivating the hearts of readers worldwide. Lets delve into the realm of top-selling books, exploring the captivating narratives that have captivated audiences this year. The Must-Read : Colleen Hoover's "It Ends with Us" This heartfelt tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover skillfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed. The Motorization Of American Cities : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This intriguing historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids compelling storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. The Motorization Of American Cities : Delia Owens "Where the Crawdads Sing" This captivating coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These top-selling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and suspenseful novel that will keep you speculating until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
