Since its original publication in 1989, *Evolution: The History of an Idea* has been recognized as a comprehensive and authoritative source on the development and impact of this most controversial of scientific theories. This twentieth anniversary edition is updated with a new preface examining recent scholarship and trends within the study of evolution. Since its original publication in 1989, *Evolution: The History of an Idea* has been recognized as a comprehensive and authoritative source on the development and impact of this most controversial of scientific theories. This twentieth anniversary ed. God and Nature David C. Lindberg, Ronald L. Numbers, 2023-11-15. Since the publication in 1896 of Andrew Dickson White's classic *History of the Warfare of Science with Theology in Christendom*, no comprehensive history of the subject has appeared in the English language. Although many twentieth-century historians have written on the relationship between Christianity and science and in the process have called into question many of White's conclusions, the image of warfare lingers in the public mind. To provide an up-to-date alternative based on the best available scholarship and written in nontechnical language, the editors of this volume have assembled an international group of distinguished historians. In eighteen essays prepared especially for this book, these authors cover the period from the early Christian church to the twentieth century, offering fresh appraisals of such encounters as the trial of Galileo, the formulation of the Newtonian worldview, the coming of Darwinism and the ongoing controversies over scientific creationism. They explore not only the impact of religion on science but also the influence of science and religion. This landmark volume promises not only to silence the persistent rumors of war between Christianity and science but also serve as the point of departure for new explorations of their relationship. Scholars and general readers alike will find it provocative and readable. Since the publication in 1896 of Andrew Dickson White's classic *History of the Warfare of Science with Theology in Christendom*, no comprehensive history of the subject has appeared in the English language. This sesquicentennial project of Presbyterian College tells the stories of thirteen individuals chosen from among its graduates, faculty and benefactors whose still voices represent in unique ways the history and influence of the college over the past 150 years. Each chapter presents a biography, a sermon, address, letter or report followed by a commentary showing how this still voice spoke to the issues of the time and why it still should be heard. The themes remind us of the college's continuing mission to provide the Church with strong and visionary leaders. The book concludes with useful lists of Presbyterian College's students, scholars, supporters and societies down through the years. *National Library of Medicine Current Catalog* National Library of Medicine (U.S.), 1972.

Gundlach, 2013-11-30 Charles Hodge James McCosh B B Warfield these leading professors at Princeton College and Seminary in the nineteenth and early twentieth centuries are famous for their orthodox Protestant positions on the doctrine of evolution In this book Bradley Gundlach explores the surprisingly positive embrace of developmental views by the whole community of thinkers at old Princeton showing how they embraced the development not only of the cosmos and life forms but also of Scripture and the history of doctrine even as they defended their historic Christian creed Decrying an intellectual world gone evolution mad the old Princetonians nevertheless welcomed evolution properly limited and explained Rejecting historicism and Darwinism they affirmed developmentalism and certain non Darwinian evolutionary theories finding process over time through the agency of second causes God s providential rule in the world both enlightening and polemically useful They also took care to identify the pernicious causes and effects of antisupernatural evolutionisms By the 1920s their nuanced distinctions together with their advocacy of both biblical inerrancy and modern science were overwhelmed by the brewing fundamentalist controversy From the first American review of the pre Darwinian *Vestiges of the Natural History of Creation* to the Scopes Trial and the forced reorganization of Princeton Seminary in 1929 *Process and Providence* reliably portrays the preeminent conservative Protestants in America as they defined contested and answered precisely and incisively the many facets of the evolution question **A Disciplined Intelligence** A. B. McKillop, 2001 This highly original contribution to Canadian intellectual history examines the course of critical inquiry and its relationship to the assertion of moral authority in English Canadian thought during the Victorian era *The Ottawa Naturalist* , 1899 **The 'Creed of Science' in Victorian England** Roy M. MacLeod, 2024-10-28 The nineteenth century which saw the triumph of the idea of progress and improvement saw also the triumph of science as a political and cultural force In England as science and its methods claimed privilege and space its language acquired the vocabulary of religion The new creed of science embraced what John Tyndall called the scientific movement it was in the language of T H Huxley a militant creed The march of invention the discoveries of chemistry and the wonders of steam and electricity culminated in a crusade against ignorance and unbelief It was a creed that looked to its own apostolic succession from Copernicus Galileo and the martyrs of the scientific revolution Yet it was a creed whose doctrines were divisive and whose convictions resisted Alongside arguments for materialism utility positivism and evolutionary naturalism persisted reservations about the nature of man the role of ethics and the limits of scientific method These essays discuss leading strategists in the scientific movement of late Victorian England At the same time they show how science established served not only the scientific community but also the interests of imperial and colonial powers *The Regenerators, 2nd Edition* Ramsay Cook, 2016-01-01 A crisis of faith confronted many Canadian Protestants in the late nineteenth century With their religious beliefs challenged by the new biological sciences and historical criticism of the Bible they turned from personal salvation to the dire social problems of the industrial age *The Regenerators* explores the nature of

social criticism in this era and its complex ties to the religious thinking of the day showing how the path blazed by nineteenth century religious liberals led not to the Kingdom of God on earth but ironically to the secular city The winner of the Governor General's Literary Award for Non Fiction when it was first published in 1985 *The Regenerators* became an instant classic for its fascinating portraits of evolutionists rationalists spiritualists socialists and free thinkers before the turn of the century This new edition features an introduction by historian and biographer Donald Wright *The Creationists* Ronald L. Numbers, 1993-01-01 Forty seven percent of the American people according to a 1991 Gallup poll believe that God made man as man is now in a single act of creation and within the last ten thousand years Ronald L Numbers chronicles the astonishing resurgence of this belief since the 1960s as well as the creationist movement's tangled roots in the theologies of late nineteenth and early twentieth century Baptists Presbyterians Lutherans Adventists and other religious groups Even more remarkable than Numbers's story of today's widespread rejection of the theory of evolution is the dramatic shift from acceptance of the earth's antiquity to the insistence of present day scientific creationists that most fossils date back to Noah's flood and its aftermath and that the earth itself is not more than ten thousand years old Numbers traces the evolution of scientific creationism and shows how the creationist movement challenges the very meaning of science Science, Technology and Canadian History Richard A. Jarrell, Norman R. Ball, 2006-01-01 The first Conference on the Study of the History of Canadian Science and Technology held in Kingston Ontario in November 1978 marks the emergence of a new Canadian discipline This wide ranging bilingual collection of papers and workshops includes contributions by some of the historians scientists educators students archivists and government representatives present at the conference The papers discuss the nature of the new field its objectives and the problems of resources funding publishing and practical uses which face historians of Canadian science and technology Records of the workshops convey the flavour of excitement present at the conference Included in the volume are an extensive bibliography and listings of museums and available collections research in progress and conference participants **McGill University Magazine** ,1905
