Golden, S. Raghavan, Edward A. Wasil, 2008-07-20 Theoretical research and practical applications in the field of vehicle routing started in 1959 with the truck dispatching problem posed by Dantzig and Ramser 1 and the optimum routing of a fleet of gasoline delivery trucks between a bulk terminal and a large number of service stations supplied by the terminal Using a method based on a linear programming formulation their hand calculations produced a near optimal solution with four routes to a problem with twelve service stations The authors proclaimed No practical applications of the method have been made as yet In the nearly 50 years since the Dantzig and Ramser paper appeared work in the field has exploded dramatically Today a Google Scholar search of the words vehicle routing problem VRP yields more than 21 700 entries The June 2006 issue of OR MS Today provided a survey of 17 vendors of commercial routing software whose packages are currently capable of solving average size problems with 1 000 stops 50 routes and two hour hard time windows in two to ten minutes 2 In practice vehicle routing may be the single biggest success story in operations research For example each day 103 500 drivers at UPS follow computer generated routes The

drivers visit 7.9 million customers and handle an average of 15.6 million packages. What If? Building Students' Problem-Solving Skills Through Complex Challenges Ronald A. Beghetto, 2018-08-28 If a fundamental goal of schooling is to prepare young people for the unknowable future why do we assign students so many clearly defined tasks with predetermined solutions According to educator and creativity expert Ronald A Beghetto the best way to unleash students problem solving and creativity and thus prepare them to face real world problems is to incorporate complex challenges that teach students to respond productively to uncertainty In this thought provoking book Beghetto explains How to foster possibility thinking to help students open up their thinking in creative sometimes counterintuitive ways The process of lesson unplanning a way of transforming existing lessons activities and assignments into more complex classroom challenges Four basic action principles that teachers and students can use to design and solve complex challenges both inside and outside the classroom The steps for creating legacy challenges which require students to identify a problem develop a solution and ensure that their work makes a lasting contribution With planning forms and detailed sample activities this practical guide will enable teachers at every grade level to design a full range of challenges in any subject area Invite uncertainty into your classroom and discover what your students are capable of *The Computing Teacher*, 1987 *The 60 Second Innovator* Jeff Davidson, 2009-08-18 When the economy is in free fall the strongest competitors are the ones rooted in innovation Today managers are screaming for innovators who can break through to the next level of business and technology In sixty succinct humorous tips Jeff Davidson helps you learn the practices that will make you a great innovator such as Develop the qualities all innovators share Embrace change Enhance out of the box thinking Find new solutions to old problems Be a business innovator as well as a team player This guide doesn't just show you how to think outside of the box it shows you how to hop out of the box pick it up turn it upside down and shake out new ideas for profit and success **Advances in Artificial Intelligence** Eleni Stroulia, Stan Matwin, 2003-06-29 AI 2001 is the 14th in the series of Artificial Intelligence conferences sponsored by the Canadian Society for Computational Studies of Intelligence Soci  t   nadienne pour l  tude de l  intelligence par ordinateur As was the case last year too the conference is being held in conjunction with the annual conferences of two other Canadian societies Graphics Interface GI 2001 and Vision Interface VI 2001 We believe that the overall experience will be enriched by this conjunction of conferences This year is the silver anniversary of the conference the first Canadian AI conference was held in 1976 at UBC During its lifetime it has attracted Canadian and international papers of high quality from a variety of AI research areas All papers submitted to the conference received at least three independent reviews Approximately one third were accepted for plenary presentation at the conference The best paper of the conference will be invited to appear in **Computational Intelligence Software System Design Methods** Josef K. Skwirzynski, 2012-12-06 In this volume we present the full proceedings of a NATO Advanced Study Institute ASI on the theme of the challenge of advanced computing technology to system design methods This is in fact the second ASI organised by myself and my

colleagues in the field of systems reliability the first was about Electronic Systems Effectiveness and Life Cycle Costing and the proceedings were published by the same publisher in 1983 as Series F Computer and System Sciences No 3 The first part of the present proceedings concentrates on the development of low fault and fault tolerant software In organising this session I was greatly helped by Mr John Musa and Professor V R Basili The latter and Or R W Selby open our text with their interesting approach to the problem of data collection and of observation sampling for statistical analysis of software development software testing strategies and error analysis The problem of clean room software development is also considered Next Professor B Randell discusses recursively structured fault tolerant distributed computer systems and bases his approach on a UNIX system example His aim is to establish that a distributed system should be functionally equivalent to an individual computing system Or L F Pau considers knowledge engineering techniques applied to fault detection test generation and maintenance of software This is illustrated by a variety of examples such as electronic failure detection control system testing analysis of intermittent failures false alarm reduction and others Following this Mr M
