Skepticism and Cognitivism Oliver A. Johnson, 1978-01-01

Skepticism and Cognitivism Oliver A.

Johnson, 2024-03-29 *Skepticism and Cognitivism* addresses the fundamental question of epistemology: Is knowledge possible? It approaches this query with an evaluation of the skeptical tradition in Western philosophy, analyzing thinkers who have claimed that we can know nothing. After an introductory chapter lays out the central issues, chapter 2 focuses on the classical skeptics of the Academic and Pyrrhonic schools, and then on the skepticism of David Hume. Chapters 3 through 5 are devoted to contemporary defenders of skepticism: Keith Lehrer, Arne Næss, and Peter Unger. In chapter 6, author Oliver A. Johnson dons the mantle of skeptic himself and develops and adds theories to the skeptical arsenal. He closes with an examination of the relationship between skepticism and cognitivism, reaching and defending conclusions on the nature and extent of possible human knowledge. This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1978.

Ethical Naturalism Susana Nuccetelli, Gary

Seay, 2011-12-08 *Ethical naturalism* is narrowly construed as the doctrine that there are moral properties and facts, at least some of which are natural properties and facts. Perhaps owing to its having faced early on intuitively forceful objections by eliminativists and non-naturalists, ethical naturalism has only recently become a central player in the debates about the status of moral properties and facts, which have occupied philosophers over the last century. It has now become a driving force in those debates, one with sufficient resources to challenge not only eliminativism, especially in its various non-cognitivist forms, but also the most sophisticated versions of non-naturalism. This volume brings together twelve new essays which make it clear that in light of recent developments in analytic philosophy and the social sciences, there are novel grounds for reassessing the doctrines at stake in these debates.
