Black and Slave David M. Goldenberg, 2017-05-22 Studies of the Curse of Ham the belief that the Bible consigned blacks to everlasting servitude confuse and conflate two separate origins stories etiologies one of black skin and the other of black slavery This work unravels the etiologies and shows how the Curse an etiology of black slavery evolved from an earlier etiology explaining the existence of dark skinned people We see when where why and how an original mythic tale of black origins morphed into a story of the origins of black slavery and how in turn the second then supplanted the first as an explanation for black skin In the process we see how formulations of the Curse changed over time depending on the historical and social contexts reflecting and refashioning the way blackness and blacks were perceived In particular two significant developments are uncovered First a curse of slavery originally said to affect various dark skinned peoples was eventually applied most commonly to black Africans Second blackness originally incidental to the curse in time became part of the curse itself Dark skin now became an intentional marker of servitude the visible sign of the blacks degradation and in the process deprecating black skin itself

Agents without Empire Antónia Szabari,2024-03-05 It is well known that Renaissance culture gave an empowering role to the individual and thereby to agency But how does race factor into this culture of empowerment Canonical French authors like Rabelais and Montaigne

have been celebrated for their flexible worldviews and interest in the difference of non French cultures both inside and outside of Europe As a result this period in French cultural history has come to be valued as an exceptional era of cultural opening toward others Agents without Empire shows that such a celebration is at the very least problematic Szabari argues that before the rise of the French colonial empire medieval categories of race based on the redemption story were recast through accounts of the Ottoman Empire that were made accessible in a sudden and unprecedented manner to agents of the French crown Spying performed by Frenchmen in the Ottoman Empire in the sixteenth century permeated French culture in large part because those who spied also worked as knowledge producers propagandists and artists The practice changed what it meant to be cultured and elite by creating new avenues of race and gender specific consumption for French and European men that affected all areas of sophisticated culture including literature politics prints dressing personal hygiene and leisure Agents without Empire explores race making in this period of European history in the context of diplomatic reports travel accounts natural history propaganda religious literature poetry theater fiction and cheap print It intervenes in conversations in whiteness studies race theory theories of agency and matter and the history of diplomacy and spying to offer a new account of race making in early modern Europe
