Latin American Perspectives on Science and Religion Ignacio Silva, 2015-10-06 Latin America plays an increasingly important role in the development of modern Christianity yet it has been underrepresented in current scholarship on religion and science In this first book on the subject contributors explore the different ways that religion and science relate to each other     **Heart of Creation** Andrea Joyce Stone, 2002 This accessible state of the art review of Mayan hieroglyphics and cosmology also serves as a tribute to one of the field s most noted pioneers The core of this book focuses on the current study

of Mayan hieroglyphics as inspired by the recently deceased Mayanist Linda Schele As author or coauthor of more than 200 books or articles on the Maya Schele served as the chief disseminator of knowledge to the general public about this ancient Mesoamerican culture similar to the way in which Margaret Mead introduced anthropology and the people of Borneo to the English speaking world Twenty five contributors offer scholarly writings on subjects ranging from the ritual function of public space at the Olmec site and the gardens of the Great Goddess at Teotihuacan to the understanding of Jupiter in Maya astronomy and the meaning of the water throne of Quirigua Zoomorph P The workshops on Maya history and writing that Schele conducted in Guatemala and Mexico for the highland people modern descendants of the Mayan civilization are thoroughly addressed as is the phenomenon termed Maya mania the explosive growth of interest in Maya epigraphy iconography astronomy and cosmology that Schele stimulated An appendix provides a bibliography of Schele s publications and a collection of Scheleana written memories of the Rabbit Woman by some of her colleagues and students Of interest to professionals as well as generalists this collection will stand as a marker of the state of Mayan studies at the turn of the 21st century and as a tribute to the remarkable personality who guided a large part of that archaeological research for more than two decades     Re-Creating Primordial Time Gabrielle Vail, Christine Hernández, 2013-10-15 Re Creating Primordial Time

offers a new perspective on the Maya codices documenting the extensive use of creation mythology and foundational rituals in the hieroglyphic texts and iconography of these important manuscripts Focusing on both pre Columbian codices and early colonial creation accounts Vail and Hernández show that in spite of significant cultural change during the Postclassic and Colonial periods the mythological traditions reveal significant continuity beginning as far back as the Classic period Remarkable similarities exist within the Maya tradition even as new mythologies were introduced through contact with the Gulf Coast region and highland central Mexico Vail and Hernández analyze the extant Maya codices within the context of later literary sources such as the Books of Chilam Balam the Popol Vuh and the C dice Chimalpopoca to present numerous examples highlighting the relationship among creation mythology rituals and lore Compiling and comparing Maya creation mythology with that of the Borgia codices from highland central Mexico Re Creating Primordial Time is a significant
