Embracing Autism Robert Parish, 2013-05-17 The voices here confirm what I've always suspected: everyone is part of one large continuum, and the approaches and insights recounted here can help any parent, any educator, any person deal with any child or, for that matter, any other person more effectively and with more compassion. I only wish I'd encountered earlier this cadre of experienced and caring individuals whose humor and resourcefulness represent clearly how best to love and nurture a child. Cynthia Nitz, J.D. Ph.D., University of Cincinnati. Through sensitive, sometimes humorous, experienced-based writing from teachers, clinicians, and parent activists in the Autism Spectrum Disorder (ASD) community, this book will help educators and others to better understand the world inhabited by ASD children. The stories contained in the book will inspire and inform readers who are working day to day with children in the autism spectrum, providing valuable insights into what makes these kids tick and useful information on how they communicate, learn, and succeed. Robert Parish, Cincinnati, OH is an award-winning journalist with four nationally broadcast public TV documentaries about Autism Spectrum Disorders to his credit, as well as more than 100 digital video projects about ASD for the educational market.

Ghosts in the Garden Beth Kephart, 2011-02-08 National Book Award nominee Beth Kephart's new book is an enchanting midlife meditation on aging, identity, and memory set against the backdrop of Chanticleer Garden in Pennsylvania. On the morning of her forty-first birthday, Kephart, a mother, a wife, and a writer pressured by deadlines, finds herself at Chanticleer, one of the world's most celebrated pleasure gardens. She knows little of the language of flowers. She cannot name the birds in the trees. She is a stranger among the gardeners and the people passing by. And yet she understands that she has somehow found her way to a place that can teach her about life and growth, about the past and the future. Week

after week she returns to Chanticleer recalling her childhood self mulling over legacy and soul striking up friendships with gardeners and conversations with other visitors Succored by the seasons and the weather she finds the grace in approaching middle age There are lessons in seeds and she finds them There are lessons in letting go Kephart writes about questions we all ask ourselves How do we remember who we used to be How do we imagine who we ll become Have we lived our lives as we set out to What legacies do we wish to leave behind The book spans a two year cycle and each chapter is accompanied by a gorgeous black and white photograph of Chanticleer by William Sulit Ghosts in the Garden pulses with possibility and purpose with wisdom that is ageless and transcendent

The Autism Matrix Gil Eyal, 2013-08-26 Today autism has become highly visible Once you begin to look for it you realize it is everywhere Why We all know the answer or think we do there is an autism epidemic And if it is an epidemic then we know what must be done lots of money must be thrown at it detection centers must be established and explanations sought so that the number of new cases can be brought down and the epidemic brought under control But can it really be so simple This major new book offers a very different interpretation The authors argue that the recent rise in autism should be understood an aftershock of the real earthquake which was the deinstitutionalization of mental retardation in the mid 1970s This entailed a radical transformation not only of the institutional matrix for dealing with developmental disorders of childhood but also of

the cultural lens through which we view them It opened up a space for viewing and treating childhood disorders as neither mental illness nor mental retardation neither curable nor incurable but somewhere in between The authors show that where deinstitutionalization went the furthest as in Scandinavia UK and the blue states of the US autism rates are also highest Where it was absent or delayed as in France autism rates are low Combining a historical narrative with international comparison The Autism Matrix offers a fresh and powerful analysis of a condition that affects many parents and children today

Representing Autism Stuart Fletcher Murray, 2008-06-01 From concerns of an autism epidemic to the MMR vaccine crisis autism is a source of peculiar fascination in the contemporary media Discussion of the condition has been largely framed within medicine psychiatry and education but there has been no exploration of its power within representative narrative forms Representing Autism is the first book to tackle this approach using contemporary fiction and memoir writing film photography drama and documentary together with older texts to set the contemporary fascination with autism in context Representing Autism analyses and evaluates the place of autism within contemporary culture and at the same time examines the ideas of individual and community produced by people with autism themselves to establish the ideas of autistic presence that emerge from within a space of cognitive exceptionality Central to the book is a sense of the legitimacy of autistic presence as a way by which we might more fully articulate what it means to be human
