Sismo Grado 1:

2012 Hugo Enrique Reyes Devesa, 2012-03 En diversos documentales que han circulado por los medios informativos e inclusive en la Internet el 2012 aparece el año del Juicio Final o el Hunab Ku según las profecías de los mayas mencionado que la raza humana y nuestro planeta sufrirán una catástrofe de proporciones inimaginables. Estos hechos se ven vinculados a un fenómeno sísmico que ocurre cada 25 800 años y que tendrá lugar en el solsticio de invierno del 2012 cuando la Tierra se encuentre alineada con el Sol y el centro de nuestra galaxia la Vía Láctea donde existe un agujero negro ocasionando alteraciones en el manto terrestre y por consiguiente en la superficie de nuestro planeta. A raíz de estos augurios que vaticinan un peligro inminente a la Tierra y a sus pobladores los protagonistas de esta increíble aventura se hacen a la tarea de iniciar una investigación científica que les proporcionará una información más exacta de la realidad del peligro que estaba a punto de desatarse y esto era a la vuelta de la esquina ya que de ocurrir esta catástrofe ocurriría en tan solo dos años. El resultado de dicha investigación hace que uno de ellos exponga una hipótesis aterradora y descabellada: la supe marea del manto terrestre ejercida por las fuerzas gravitacionales del Sol y el agujero negro. Con la ayuda de dos geofísicos estadounidenses emprenden una odisea que inicia con la búsqueda de un lugar seguro y la creación de un refugio que pueda contener los embates apocalípticos de dicho efecto gravitacional sísmico. Sin embargo los eventos dan inicio mucho antes de lo esperado por lo que se ven obligados a adelantar sus planes de huida y de sobrevivencia viéndose envueltos en una serie de controversias ante las decisiones que tienen que tomar con respecto a cuántos y quiénes deben acudir a San Pedro y lo que tienen que llevar consigo. Todo lo que inicia tiene un fin. Desde que el ser humano existe y de acuerdo con la historia que nos habla de Oráculos y profetas siempre ha esperado con temor el día en que llegue este final. Ficción o una realidad. El año 2012 pondrá fin a la existencia del ser humano sobre la faz de la Tierra. Podrá soportar nuestro planeta y nosotros mismo seremos capaces de sobrevivir a esta devastadora ecuación sísmica. Hugo Enrique Reyes Devesa **Report of the Session**, 1928

, **Conference on Solid Earth Problems: Symposium on the Results of Upper Mantle Investigations With Emphasis on Latin America**, 1970 **El apocalipsis a la vuelta de la esquina** Jesús Cosamalón, 2018-10-09 Las décadas de 1980 y 1990 son recordadas por la gran cantidad de dificultades que el Perú afrontó: violencia, amenaza de cataclismos, basurales, epidemias, interminables huelgas y como si fuera poco una profunda crisis económica que nos hizo creer que las plagas del apocalipsis se habían ensañado con los peruanos. Mientras esto ocurría a nivel nacional otro conflicto no menos importante se desarrollaba en las calles de Lima: la expansión del comercio informal que agregó enfrentamientos entre autoridades, comerciantes y vecinos. Este libro enfrenta la tarea de explicar esa expansión analizando este fenómeno y su relación con la crisis mayor del Estado nacional y local, sus vínculos con la extensa y profunda crisis económica y su impacto en los imaginarios urbanos. Además esta investigación busca incorporar la perspectiva de los propios ambulantes por medio de la información periodística y entrevistas. Una propuesta importante de este libro se resume en discutir si la expansión del

ambulante una de las caras más visibles de la informalidad se debió a un exceso de regulación estatal la cual se habría producido paradójicamente en un contexto de extrema debilidad del Estado peruano agobiado por la crisis y la violencia política Estudio del sismo del bajo Segura del 6 de mayo de 1953 Alfonso Rey Pastor, Juan Martín Romero, 1954

Estructuras. Hormigón armado Jorge Bernal, 2021-06-01 Este trabajo es una actualización del libro *Introducción a las Estructuras* editado hace más de veinte años. Fue un tiempo suficiente para un libro técnico. En esas décadas se han modificado varios principios y teorías de las ciencias de la construcción también las técnicas y las tecnologías utilizadas para la realización de las obras. Para completar este nuevo escenario han surgido nuevos materiales y otros mejoraron sus cualidades. Por todo ello hemos realizado una revisión del libro original para adaptarlo al actual estado de las ciencias y tecnologías que componen la disciplina de la construcción de los edificios

Temas de estructuras especiales Pedro Perler, 2021-05-19 Consecuente con los criterios pedagógicos aplicados en las Cátedras de Estructuras que presido para la enseñanza de las disciplinas resistentes a los alumnos de arquitectura orientados a su contextualización se intenta en este libro una articulación permanente de todos los temas con los fundamentos básicos que rigen los principios de la Estática y Resistencia de materiales. Con estas premisas se abordan los diferentes temas que abarcan los Edificios en altura las Construcciones antisísmicas las Estructuras de tracción los Arcos y Bovedas las Estructuras laminares. El desarrollo vertiginoso en las últimas décadas de los Edificios en altura hacen imprescindible su estudio pues las enormes dimensiones que poseen y su gran esbeltez provocan la aparición de esfuerzos de tal magnitud que transforman a la estructura en el principal protagonista del complejo edificio subordinando buena parte de los requerimientos proyectuales a la necesidad de contar con un sistema resistente confiable. El estudio de las Estructuras Sismorresistentes ha ido adquiriendo importancia creciente en los últimos años a partir de una serie de movimientos sísmicos que abarcaron no solo a las zonas de Cuyo cercanas al epicentro sino que se extendieron y alcanzaron en sus efectos a vastas regiones de nuestro territorio.
