designed to teach basic intellectual and affective skills This book records the program s progress and suggests further avenues for research Comprised of eight chapters this book begins with an overview of the theoretical underpinnings of the teaching and learning approaches to the improvement of education followed by a discussion on DARPA s preliminary work on an empirically based learning strategy training program as well as its efforts to expand and modify the program In order to provide an intellectual foundation for this program several fields are surveyed for potential learning strategies namely cognitive psychology artificial intelligence behavioral modification and motor learning An instructional systems development approach for learning strategies is also proposed The final chapter deals with models of evaluation extant in education and training and discusses the specific application of transactional evaluation to the DARPA Learning Strategies Research Program This monograph should be of interest to students teachers and educational psychologists

Instructional-design Theories and Models Charles M. Reigeluth, 2013-05-13 Instructional theory describes a variety of methods of instruction different ways of facilitating human learning and development and when to use and not use each of those methods It is about how to help people learn better This volume provides a concise summary of a broad sampling of new methods of instruction currently under development helps show the interrelationships among these diverse theories and highlights current issues and trends in instructional design It is a sequel to Instructional Design Theories and Models An Overview of Their Current Status which provided a snapshot in time of the status of instructional theory in the early 1980s Dramatic changes in the nature of instructional theory have occurred since then partly in response to advances in knowledge about the human brain and learning theory partly due to shifts in educational philosophies and beliefs and partly in response to advances in information technologies These changes have made new methods of instruction not only possible but also necessary in order to take advantage of new instructional capabilities offered by the new technologies These changes are so dramatic that many argue they constitute a new paradigm of instruction which requires a new paradigm of instructional theory In short there is a clear need for this Volume II of Instructional Design Theories and Models To attain the broad sampling of methods and theories it presents and to make this book more useful for practitioners as well as graduate students interested in education and training this volume contains twice as many chapters but each half as long as the ones in Volume I and the descriptions are generally less technical Several unique features are provided by the editor to help readers understand and compare the theories in this book Chapter 1 which discusses the characteristics of instructional theory and the nature of the new paradigm of instruction helps the reader identify commonalities across the theories Chapter forewords which summarize the major elements of the instructional design theories are useful for reviewing and comparing theories as well as for previewing a theory to decide if it is of interest and for developing a general schema that will make it easier to understand Editor s notes provide additional help in understanding and comparing the theories and the new paradigm of instruction to which they belong Units 2 and 4 have introductory chapters to help readers analyze and understand the theories in those units This is an

essential book for anyone interested in exploring new approaches to fostering human learning and development and thinking creatively about ways to best meet the needs of learners in all kinds of learning contexts Readers are invited to use Dr Charles Reigeluth's Web site to comment and to view others' comments about the instructional design theories in this book as well as other theories Point your browser to www.indiana.edu/idtheory
