Kaltsas, Nikolaos Kaltsas, Ethnikon Archaologikon Mouseion (Greece), 2002

A superb catalogue of Greek Hellenistic and Roman sculpture displayed in the National Archaeological Museum in Athens containing some of the finest art works of the ancient world Architectural Networks in the North Aegean William Aylward, Jacques des Courtils, Bonna D. Wescoat, 2025

During the Hellenistic period the North Aegean Sea was a dynamic and diverse area linked by robust trading networks and sometimes precarious political allegiances The islands of Thasos Samothrace and Lesbos in particular played crucial roles in their position between Anatolia Macedonia Thrace and Greece Migration trade and politics not to mention the specifics of sites and climate shaped the development of architecture The region pioneered many innovations that subsequently spread across the Mediterranean Employing the idea of networks to effectively describe the interconnectedness of design materials technology religion and politics the contributors to this volume establish the need to understand this important region holistically and on its own terms Taking a close look at major buildings and monuments while considering technique design and decoration as elements of a vigorous web this volume offers important insights about the area's significance in the history of Hellenistic architecture including lasting innovations in architectural illusion Ionic entablature and groundbreaking uses of marble and plaster From the North Aegean such principles and tactics were transmitted to the rest of the Hellenistic world influencing Roman architecture and from there Western architectural history **Experience, Narrative, and Criticism in Ancient Greece** Jonas Grethlein, Luuk Huitink, Aldo Carlo Fernando Tagliabue, 2020

Drawing on cognitive approaches to literary studies this volume pursues a new approach to ancient Greek narrative that transcends the taxonomies of structuralist narratologies deploying concepts such as immersion and embodiment in order to establish a more comprehensive understanding of ancient Greek narrative and ancient reading habits Euphrosyne Peter Burian, Jenny Strauss Clay, Gregson Davis, 2020-03-09

The Power of Pygmalion Liana Giannakopoulou, 2007 This book explores the relationship between ancient Greek sculpture and modern Greek poetry between 1860 and 1960 It examines in some detail poems by Vasileiadis Rangavis Palamas Cavafy Sikelianos and Seferis and shows how these poets appropriate the art of sculpture and in what ways this contributes to our understanding of each poet's poetics Ancient Greek sculpture and sculptural imagery related to it are inevitably associated with the Classical heritage and bring the issue of ancient tradition and its relation to the modern artist into a prominent position What is more sculpture is particularly important for the erotic dimension through which the poets perceive their relation with art and each poet systematically uses the image of the sculptor to define his perception of the artist In both cases the myth of Pygmalion may be seen as successfully embodying each poet's relation with art and tradition

Conversations-Lexicon Für Bildende Kunst, 1843 **Greek Art and Aesthetics in the Fourth Century B.C.** William A. P. Childs, 2018-04-10 *Greek Art and Aesthetics in the Fourth Century B C* analyzes the broad character of art produced during this period providing in depth analysis of and commentary on many of its most notable examples of sculpture and painting Taking into consideration developments in style and subject matter and elucidating political religious and intellectual context William A P Childs argues that Greek art in this era was a natural outgrowth of the

high classical period and focused on developing the rudiments of individual expression that became the hallmark of the classical in the fifth century As Childs shows in many respects the art of this period corresponds with the philosophical inquiry by Plato and his contemporaries into the nature of art and speaks to the contemporaneous sense of insecurity and renewed religious devotion Delving into formal and iconographic developments in sculpture and painting Childs examines how the sensitive expressive quality of these works seamlessly links the classical and Hellenistic periods with no appreciable rupture in the continuous exploration of the human condition Another overarching theme concerns the nature of style as a concept of expression an issue that becomes more important given the increasingly multiple styles and functions of fourth century Greek art Childs also shows how the color and form of works suggested the unseen and revealed the profound character of individuals and the physical world
