Economic Inequality, Neoliberalism, and the American Community College Patrick Sullivan, 2017-05-11 This book aims to deepen public understanding of the community college and to challenge our longstanding reliance on a deficit model for defining this important powerful and transformative institution Featuring a unique combination of data and research Sullivan seeks to help redefine update and reshape public perception about community colleges This book gives serious attention to student voices and includes narratives written by

community college students about their experiences attending college at an open admissions institution Sullivan examines the history of the modern community college and the economic model that is driving much of the current discussion in higher education today Sullivan argues that the community college has done much to promote social justice and economic equality in America since the founding of the modern community college in 1947 by the Truman Commission *American Foreign Policy and The Politics of Fear* A. Trevor Thrall, Jane K. Cramer, 2009-05-07 This edited volume addresses the issue of threat inflation in American foreign policy and domestic politics The Bush administration's aggressive campaign to build public support for an invasion of Iraq reheated fears about the president's ability to manipulate the public and many charged the administration with threat inflation duping the news media and misleading the public into supporting the war under false pretences Presenting the latest research these essays seek to answer the question of why threat inflation occurs and when it will be successful Simply defined it is the effort by elites to create concern for a threat that goes beyond the scope and urgency that disinterested analysis would justify More broadly the process concerns how elites view threats the political uses of threat inflation the politics of threat framing among competing elites and how the public interprets and perceives threats via the news media The war with Iraq gets special attention in this volume along with the War on Terror Although many believe that the Bush administration successfully inflated the Iraq threat there is not a neat consensus about why this was successful Through both theoretical contributions and case studies this book showcases the four major explanations of threat inflation realism domestic politics psychology and constructivism and makes them confront one another directly The result is a richer appreciation of this important dynamic in US politics and foreign policy present and future This book will be of much interests to students of US foreign and national security policy international security strategic studies and IR in general Trevor Thrall is Assistant Professor of Political Science and directs the Master of Public Policy program at the University of Michigan Dearborn Jane Kellett Cramer is an Assistant Professor of Political Science at the University of Oregon *SMP 11-16 Book G8 School Mathematics Project*, 1994 Book G8 green series written for pupils of lower ability has been produced in response to the National Curriculum *A Theory of Argument* Mark Vorobej, 2006-03-06 A Theory of Argument is an advanced textbook intended for students in philosophy communications studies and linguistics who have completed at least one course in argumentation theory information logic critical thinking or formal logic Containing nearly 400 exercises Mark Vorobej develops a novel approach to argument interpretation and evaluation One of the key themes of the book is that we cannot succeed in distinguishing good argument from bad arguments until we learn to listen carefully to others Part I develops a relativistic account of argument cogency that allows for rational disagreement Part II offers a comprehensive and rigorous account of argument diagramming Hybrid arguments are contrasted with linked and convergent arguments and a novel technique is introduced for graphically recording disagreements with authorial claims [The Fat Studies Reader](#) Esther Rothblum, Sondra Solovay, 2009-11-01 Winner of the 2010 Distinguished Publication Award from the Association for

Women in Psychology Winner of the 2010 Susan Koppelman Award for the Best Edited Volume in Women's Studies from the Popular Culture Association A milestone anthology of fifty three voices on the burgeoning scholarly movement fat studies We have all seen the segments on television news shows A fat person walking on the sidewalk her face out of frame so she can't be identified as some disconcerting findings about the obesity epidemic stalking the nation are read by a disembodied voice And we have seen the movies their obvious lack of large leading actors silently speaking volumes From the government health industry diet industry news media and popular culture we hear that we should all be focused on our weight But is this national obsession with weight and thinness good for us Or is it just another form of prejudice one with especially dire consequences for many already disenfranchised groups For decades a growing cadre of scholars has been examining the role of body weight in society critiquing the underlying assumptions prejudices and effects of how people perceive and relate to fatness This burgeoning movement known as fat studies includes scholars from every field as well as activists artists and intellectuals The Fat Studies Reader is a milestone achievement bringing together fifty three diverse voices to explore a wide range of topics related to body weight From the historical construction of fatness to public health policy from job discrimination to social class disparities from chick lit to airline seats this collection covers it all Edited by two leaders in the field The Fat Studies Reader is an invaluable resource that provides a historical overview of fat studies an in depth examination of the movement's fundamental concerns and an up to date look at its innovative research

Poker and Philosophy Eric Bronson, 2012-03-30 Does God play cards with the universe Do women have better poker faces than men What's the most existential poker movie ever made Is life more meaningful when you go all in Is online poker really still poker Poker and Philosophy ponders these questions and more pitting young lions against old masters as the brashness of Phil Hellmuth meets the arrogance of Socrates the recklessness of Doyle Brunson challenges the desperation of Dostoyevsky and the coolness of Chris Moneymaker takes on the American tradition of capitalist ingenuity This witty collection of essays demonstrates what serious card sharks have long known winning big takes more than a good hand and a straight face Stacking the metaphorical deck with a serious grounding in philosophy is the key to raking it in because as Machiavelli proved long ago it's a lot better to be feared than loved and lying is not the same as cheating
