Local Government in Europe Carlo Panara, Michael R. Varney, 2013-12-04 This work considers the role of local government in 13 EU Member States Austria Belgium Czech Republic France Germany Greece Hungary Italy Netherlands Poland Spain Sweden and the United Kingdom The book aims to provide an account of the system of local government in each of the countries studied along with a critical and contextual approach to the level of autonomy that local government enjoys The approach is comparative based on a questionnaire which all of the authors considered There is then a detailed conclusion to the book which offers a detailed summary and comparative analysis of the responses in order to better consider the role of local authorities as the fourth level of governance in the EU The book aims to offer a detailed introduction to and account of each system of local government which may appeal to those seeking an overview of the area but also a critical and contextual approach that will be of interest to those actively researching in the areas of local and regional government or EU central local government relations The book contains details of reform in local government up to November 2012 including an analysis of the impact of austerity measures on local autonomy where these have become significant *Europe, Regions and European Regionalism* Roger Scully, Richard Wyn Jones, 2010-10-13 Europe Regions and European Regionalism examines the political role of regions and regionalism within contemporary Europe Offering an up to date analysis of regionalism with a broad empirical scope this book explores regions and regionalism in the period after the substantial enlargements of the European Union Local Government in Ireland Mark Callanan, Justin F. Keogan, 2003 Europeanization and Territorial Politics in Small European Unitary States Sandrina Antunes, John Loughlin, 2020-12-17 The book addresses the impact of the European Union EU on subnational mobilization in small unitary states Located at the intersection of contributions from the literatures on multilevel governance and Europeanization this book offers a new theoretical framework to account for state rescaling processes in small unitary states By means of a comparative analysis of eight small unitary states in Europe this book shows that the impact of the EU on subnational mobilization is filtered through domestic mediating factors which can lead to three possible outcomes decentralization recentralization or no change The book offers a balanced combination of analytical clarity and the richness of empirical accounts in a wide diversity of case studies It sheds a new light on the hybrid nature of the European polity and demonstrates that member state governments have remained the most important pieces of the European puzzle Overall it arrives at two conclusions first that we are witnessing a transformation of the state rather than its demise second the notion of a Europe of the Regions in small unitary states was no more than a damp squib The chapters in this book were originally published as a special issue of the journal Regional Federal Studies **Six years in the EU**, 2001 It is six years since Sweden joined the European Union The aim of this report is to analyse the consequences of EU membership for Sweden s municipalities county councils and regions It is based on interviews with experts at the Swedish Association of Local Authorities and the Swedish Federation of County Councils as well as with councillors and EU
