**Teaching Science in the Block** Alvin Pettus, Myron Blosser, 2014-01-09 This book provides detailed instructional strategies, sample lesson plans and sample assessments to help science teachers make the best use of the additional time available in a block schedule.

**Making Meaning by Making Connections** Kathy L. Schuh, 2016-10-20 This book documents those first links that students make between content they learn in their classrooms and their prior experiences. Through six late elementary school case studies, these knowledge construction links are brought to life. The links of the students are often rich in describing who these individuals are, where they are in their learning process and what is meaningful to them. Many times these links point to what has been learned both in and out of school and the contexts when and where that learning took place. The rhizome metaphor was used to guide the development and interpretation of the studies while the lens of Peircian semiotics provides an interpretation for these initial links. The resulting grounded theory is presented through a rich and extensive presentation of excerpts from classroom observations, student interviews and a student writing activity and describes the varying types of student links, how the links were prompted, the relationships between what the students were learning and what they already knew and specific types of in-school links. The narrative includes how these links were supported or inhibited in the classroom, drawing on the roles of the teachers in the classrooms and what constituted authority sources of information in those classrooms. Before exploring the students' linking as a process of ongoing semiosis and how this process is part of a dynamic system, a study of the relationship between student knowledge links and achievement is shared. This rich narrative will be of interest to scholars and practitioners alike and includes an extensive appendix documenting the research methods.

**Develop Management Skills** James Carlopio, Graham Andrewartha, David Whetten, Kim Cameron, 2012-03-23 Develop the personal, interpersonal and group skills vital to achieving outstanding success in today's workplace with *Developing Management Skills: A Comprehensive Guide for Leaders*. Carlopio's hallmark five-step learning approach: self-assessment, learning analysis, practice and application and its modular structure help you tailor your study to the areas you need to focus on. This practical, hands-on style resource incorporates in-text exercises and role-playing assignments and is further supported by a Companion Website that includes self-assessment exercises and additional online chapters on communication skills. *Developing Management Skills* 5th Edition is suitable for undergraduate or postgraduate courses with a specific focus on managerial skills such as capstone courses, leadership or communication skills. It is also well suited to corporate professional development training courses or simply as a resource for professionals seeking to become better managers. Overall, it is an excellent mix of theory and practical reality. I congratulate the authors for their valuable and ongoing contribution to management education and development in the Asia
