Skill Acquisition and Training Addie Johnson,Robert W. Proctor,2016-08-19 Skill Acquisition and Training describes the building blocks of cognitive motor and teamwork skills and the factors to take into account in training them The basic processes of perception cognition and action that provide the foundation for understanding skilled performance are discussed in the context of complex task requirements individual differences and extreme environmental demands The role of attention in perceiving selecting and becoming aware of information in learning new information and in performance is described in the context of specific skills A theme throughout this book is that much learning is implicit the types of knowledge and relations that can profitably be learned implicitly and the conditions under which this learning benefits performance are discussed The question of whether skill acquisition in cognitive domains shares underlying mechanisms with the acquisition of perceptual and motor skills is also addressed with a view to identifying commonalities that allow for widely applicable general theories of skill acquisition Because the complexity of real world environments puts demands on the individual to adapt to new circumstances the question of how skills research can be applied to organizational training contexts is an important one To address this this book dedicates much content to practical applications covering such issues as how training needs can be captured with task and job analyses and how to maximize training transfer by taking trainee self efficacy and goal orientation into account This comprehensive yet readable textbook is optimized for students of cognitive psychology looking to understand the intricacies of skill acquisition **In Search of Individually Optimal**

Movement Solutions in Sport: Learning between Stability and Flexibility Ana Filipa Silva,John Komar,Ludovic Seifert,2021-09-28 Cognitive Issues in Motor Expertise J. Starkes,F. Allard,1993-09-15 The intent of this book is to describe those perceptual and cognitive components which contribute to skilled motor performance in a wide variety of disciplines including sports microsurgery video games and speech Also considered are issues in the measurement of motor skill the development of motor skill across the life span and the importance of individual differences in the development of motor skill Many chapters contain studies employing the expertise approach used so successfully to study cognitive skills in

psychology Using this approach expert performers are compared to novices on domain relevant laboratory tasks in order to determine whether specific cognitive or perceptual processes are related to performance differences This volume will be of value to kinesiologists sport psychologists physical educators and cognitive psychologists who are interested in a new perspective on the nature of motor skills The majority of the chapters include reviews of the literature necessary to understand the case being made Thus the book may be understood by any reader with a basic course in psychology or motor behavior
