Skyscrapers David Bennett, James R. Steinkamp, 1995 Trace the history of the skyscraper from its beginnings in Chicago through the splendour of the Art Deco age all the way to the 21st century *Supertall: How the World's Tallest Buildings Are Reshaping Our Cities and Our Lives* Stefan Al, 2022-04-12 A thoughtful inquiry into the new generations of skyscrapers There is a lot of rich history here well and concisely told Paul Goldberger New York Times Book Review The global boom in skyscrapers why it s happening now how they re made and what they do to cities and people We are living in a new urban age and its most tangible expression is the supertall megastructures that are dramatically bigger higher and more ambitious than any in history Cities around the world are racing to build the first mile high building stretching the limits of engineering and design as never before In this fascinating work of urban history and design TED resident Stefan Al himself an experienced architect explores the factors that have led to this worldwide boom He reveals the marvelous and underappreciated feats of engineering that make today s supertalls a reality from double decker elevators that silently move up to 50 miles per hour to the sophisticated blend of polymers and steel fibers that enables concrete to withstand 8 000 tons of pressure per square meter Taking readers behind the scenes of the building and design of remarkable megastructures both from the past the Empire State Building St Paul s Cathedral the Eiffel Tower and the present Dubai s Burj Khalifa London s Shard Shanghai Tower Al demonstrates the impact of these innovations Yet while the supertall is undoubtedly a testament to great technological victories it can come at an environmental and social cost Focusing on four global cities London New York Hong Kong and Singapore Al examines the risks of wealth inequality carbon emissions and contagion that stem from supertalls And he uncovers the latest innovations in sustainable building from skyscrapers made of wood to tree covered buildings that promise to yield a better urban future Featuring more than thirty architectural drawings *Supertall* is both a fascinating exploration of our greatest accomplishments and a powerful argument for a more equitable way forward

The Skyscraper and the City Don LePan, 2025-09-18 *The Skyscraper and the City* brings together thirty years of the artist s watercolor images of cities LePan s work goes against the tradition of presenting skyscrapers with a hard and precise verticality the lines of these towers blur and bleed into each other into the sky and the natural world and often into the human life of the city In their sense of movement these watercolor images of bridges and baseball stadiums as well as of skyscrapers at times recall the work of John Marin while in their viewpoint they may bring to mind the bird s eye view city paintings of Oskar Kokoschka or John Hartman LePan s paintings have been exhibited only once in a solo show in Brooklyn in 2008 Commenting on that exhibition Hartman whose sweeping canvasses have been acclaimed world wide described these watercolor works as very good and together they form a coherent and focused body of work *The Skyscraper and the City* includes images from as far afield as Cape Town London and Sydney but the primary focus is on the North American city Calgary Chicago Los Angeles New Orleans New York and Vancouver are each the subject of numerous paintings in all over

fifty cities are represented Substantial captions accompanying many of the images discuss the circumstances in which the work was painted various aesthetic issues and the architectural history of the buildings depicted An appendix includes examples of the artist s preliminary sketches and photographs In a brief introduction LePan discusses the history of skyscraper art the nature of watercolor as a medium and his own background as a watercolor painter
