Sleeping Policemen Dale Bailey, Jack Slay Jr., 2014-07-22 A late night joyride takes a sharp turn into nightmare territory when a group of college students tries to cover up a crime of carelessness A moment of inattention on a winding roadway in the Smoky Mountains leaves a stranger dead and his accidental killers at the mercy of a possible witness Finney Durant Nick Laymon and Reed Tucker are desperate not to be linked to the crime Finney and Tucker insist on hiding the corpse and Nick hard up for money takes the man's cash But the hit and run is just the beginning of their problems once they use a key found in the victim's pocket to open a bus locker and find a videotape that opens an ever widening doorway into horror *The Regulators* Richard Bachman, Stephen King, 1997 On a perfect summer afternoon in Wentworth Ohio many of the citizens who live on Poplar street are killed mysteriously and at the center of the mystery is a young boy named Seth Garon whose supernatural powers are just awakening Reissue *Thought Provoking Writing* Winston Cockburn, 2021-08-25 Thought Provoking Writing is a literary collection of life experiences and lessons by Winston Cockburn also known as The Writer

Design and Emotion Deana McDonagh, Paul Hekkert, Jeroen van Erp, Diane Gyi, 2003-10-24 There is considerable interest in and growing recognition of the emotional domain in product development The relationship between the user and the product is paramount in industry which has led to major research investments in this area Traditional ergonomic approaches to design have concentrated on the user's physical and cognitive ability **Pandora's Hope** Bruno Latour, 1999-06-30 A scientist friend asked Bruno Latour point blank Do you believe in reality Taken aback by this strange query Latour offers his meticulous response in Pandora's Hope It is a remarkable argument for understanding the reality of science in practical terms In this book Latour identified by Richard Rorty as the new bête noire of the science worshipers gives us his most philosophically informed book since *Science in Action* Through case studies of scientists in the Amazon analyzing soil and in Pasteur's lab studying the fermentation of lactic acid he shows us the myriad steps by which events in the material world are transformed into items of scientific knowledge Through many examples in the world of technology we see how the material and human worlds come together and are reciprocally transformed in this process Why Latour asks did the idea of an independent reality free of human interaction emerge in the first place His answer to this question harking back to the debates between Might and Right narrated by Plato points to the real stakes in the so called science wars the perplexed submission of ordinary people before the warring forces of claimants to the ultimate truth **Introducing Communication**

The Regulators Stephen King, 2016-01-01 Master storyteller Stephen King presents the classic terrifying New York Times bestseller of those caught between the surreal forces of good versus evil in a small suburban Ohio town. The red van rolls past humming and glinting. Things are happening fast now, although no one on Poplar Street realizes it yet. It's a gorgeous midsummer afternoon along Poplar Street in the peaceful suburbia of Wentworth, Ohio, where life is as pleasant as you ever dreamed it could be. But that's all about to end in a blaze of gunfire and sudden violence, forever shattering the tranquility and the good times here. For the physical makeup of Poplar Street itself is now being transformed into a surreal landscape straight out of the active imagination of the innocent and vulnerable Seth Garin, an autistic boy who's been exposed to and possessed by a horrific otherworldly force of evil, one with sadistic and murderous intent and who is willing to use whatever means necessary to grow ever stronger.

Driver Behaviour and Training: Volume 2 Dr. Lisa Dorn, 2017-07-05 Research on driver behaviour over the past two decades has clearly demonstrated that the goals and motivations a driver brings to the driving task are important determinants for driver behaviour. The importance of this work is underlined by statistics. WHO figures show that road accidents are predicted to be the number three cause of death and injury by 2020, currently more than 20 million deaths and injuries per year. The objective of this second edition and of the conference on which it is based is to describe and discuss recent advances in the study of driving behaviour and driver training. It bridges the gap between practitioners in road safety and theoreticians investigating driving behaviour from a number of different perspectives and related disciplines. A major focus is to consider how driver training needs to be adapted to take into account driver characteristics, goals and motivations in order to raise awareness of how these may contribute to unsafe driving behaviour and to go on to promote the development of driver training courses that considers all the skills that are essential for road safety. As well as setting out new approaches to driver training methodology based on many years of empirical research on driver behaviour, the contributing road safety researchers and professionals consider the impact of human factors in the design of driver training as well as the traditional skills-based approach. Readership includes road safety researchers from a variety of different academic backgrounds, senior practitioners in the field of driver training from
