fundamental cause of difficulties experienced by most economies in transition has been the fact that reform has not been accompanied by the creation of new private businesses and particularly SMEs This is especially evident in states created in Europe after the dissolution of the Soviet Union where many barriers which were inherited from the old system remain in place thus inhibiting entrepreneurial progress in these countries despite a favorable political and economic environment The contributions featured in this book focus on how much progress has been achieved so far with regard to these aspects as well as identify which current barriers and issues still need to be resolved Themes include innovation performance financing venture capital educational factors and entrepreneurial learning

**Handbook of Research on Entrepreneurship Policies in Central and Eastern Europe** Friederike Welter, David Smallbone, 2011 This unique Handbook explores the role of government in the development of entrepreneurship in countries where twenty years ago private enterprise was illegal or barely tolerated The expert contributors reveal that government policy is one of the key influences on the external environment in which businesses develop particularly in countries where it has been necessary to redefine the role of the state in relation to business development They outline how government policy can also act as an enabling and or a constraining force with respect to entrepreneurship development particularly in relation to institutional

change and the development of a market based economy This Handbook includes up to date information and analysis as to how entrepreneurship policies have evolved in the wider Europe focusing on the challenges that arise in designing and implementing entrepreneurship policy The Handbook of Research on Entrepreneurship Policies in Central and Eastern Europe excellently covers different facets of entrepreneurship policies in Central and Eastern Europe and will prove invaluable for academics students and researchers of entrepreneurship and small business as well as policy studies Policy makers will also find plenty of key insights and relevant information in this important resource Entrepreneurship in Former Yugoslavia Ramo Palalić, Léo-Paul Dana, Veland Ramadani, 2018-06-22 This volume offers a comprehensive state of the art portrait of entrepreneurship and small business management issues in former Yugoslavian countries Further it provides a wealth of theoretical and empirical evidence on the role of entrepreneurship in transition economies and emerging markets Country based studies identify the processes in each country that attract financial investors and yield new business and employment opportunities In addition the studies highlight institutional constraints and political factors that hinder the development of entrepreneurship in these countries and offer recommendations for policymakers on how to improve the general business environment This book will appeal to entrepreneurship researchers as well as public policymakers in transition economies and emerging markets Transnational Business Galen Spencer Hull, 2022-03-26 First Published in 1999 Small Businesses Trickling Up in Central and Eastern Europe argues that micro small and medium sized enterprises in selected countries of Central and Eastern Europe CEE have been the key to economic growth rather than privatized large scale enterprises Small businesses have come to constitute the most dynamic element of growth in the emerging markets of the CEE region in the last decade In 1989 most of the countries of the region were still under the political and economic domination of the Soviet Union Since then a process of liberalization has been unleashed in the region to dismantle statist economic policies and replace them with free market policies This has involved programs of privatization and restructuring of state owned enterprises as well as the promotion of policies to enable a private sector to develop Small businesses are creating thousands of new jobs while large companies are retrenching and downsizing their workforce In some countries of the region this process is much further along than in others In each country however the small and medium enterprise SME sector has developed at a more rapid pace than has the privatization of the large public companies The privatization of small and medium sized state owned enterprises has been rather more successful With the economic transition there has been a flurry of new enterprises springing up throughout the region some registered as legal entities but many micro enterprises often remaining unregistered in the informal sector Micro enterprises are increasingly seen as an important element of this SME sector although they were traditionally treated separately as belonging to the informal sector and a detriment to economic growth Small Businesses Trickling Up in Central and Eastern Europe Galen Hull, 1999 First Published in 1999 Routledge is an imprint of Taylor Francis an informa company The Arab Spring Five Years Later Hafez

Ghanem,2015-12-29 The dilemma felt by Arab youth was captured in Tunisia by the selfimmolation in 2010 of Mohamed Bouazizi who was frustrated by restrictions on his small street vending business His death became the catalyst for revolts throughout the Middle East The frustration had been building for some time large segments of society were denied economic progress while the middle class was squeezed and governments had cut back on services and public employment Since the series of uprisings began the debate in Arab countries has focused almost exclusively on politics and questions of national identity However economic issues are driving the agenda and real economic grievances must be addressed in order for the many transitions to succeed Hafez Ghanem gives a thorough assessment of the Arab Spring beginning with political developments since the revolutions and changes in the legal and institutional frameworks that affect economies Arab economies grew at healthy rates before the revolts but the benefits of economic growth were unfairly distributed The politically connected reaped great benefits while educated youth could not find decent jobs and the poor and middle class struggled to make ends meet Ghanem advises that Arab countries need to adopt new economic policies and programs that enhance inclusiveness expand the middle class and foster growth in undeveloped regions Key elements include strengthening economic institutions developing small businesses reforming the education system to better prepare Arab youth for the modern labor market promoting gender equality with the objective of raising female labor market participation rates and setting up programs for rural and regional development to reduce inequality and eliminate extreme poverty Youth Entrepreneurship and Local Development in Central and Eastern Europe Bruno Dallago,2017-11-30 This book analyses the opportunities and barriers for youth entrepreneurship amid systemic change in Central and Eastern Europe The authors cover different aspects of youth entrepreneurship and its contribution to the debate on youth unemployment in transition economies The book discusses the wide spread over optimism regarding youth entrepreneurship self employment and its impact on economic innovation and job creation resulting from a disregard of critical contextual features and the characteristics of young entrepreneurs themselves The authors give due acknowledgment of the importance of both factors and so fully understand the impediments to youth entrepreneurship especially in a transition context Furthermore they seek to assess the opportunities and constraints of promotion policies in transition economies Most importantly the book provides the first empirical contribution to youth entrepreneurship in Central and Eastern Europe by offering a representative number of case studies The book will be invaluable reading for scholars and students of transition and developing countries particularly those with an interest in entrepreneurship **The Arab Spring Five Years Later: Vol. 1 &** Hafez Ghanem,2016-03-01 This two volume set explores in depth the economic origins and repercussions of the Arab Spring revolts Volume 1 of The Arab Spring Five Years Later is based on extensive research conducted by scholars from a variety of backgrounds including many associated with the Japan International Cooperation Agency JICA The original research papers are gathered in volume 2 and are available for readers who wish to go even further in understanding the economic
